

Aves do meu Quintal

Fotografias de Antônio Carlos Monteiro Chaves
Primavera / 2024

Na capa deste livro digital, foto tirada em 03/10/2024 de um tucanuçu em uma embauveira calcinada pelo fogo após incêndio de grandes proporções na bacia do Ribeirão Limeira, junto à floresta da FPV.

Precisamos agir preventivamente a fim de evitar incêndios que se repetem com cada vez mais força e em intervalos menores. É essencial, também, que áreas degradadas sejam recuperadas para que consigamos preservar a biodiversidade. Caso contrário, por quanto tempo teremos tantas e tão belas aves em Piquete?

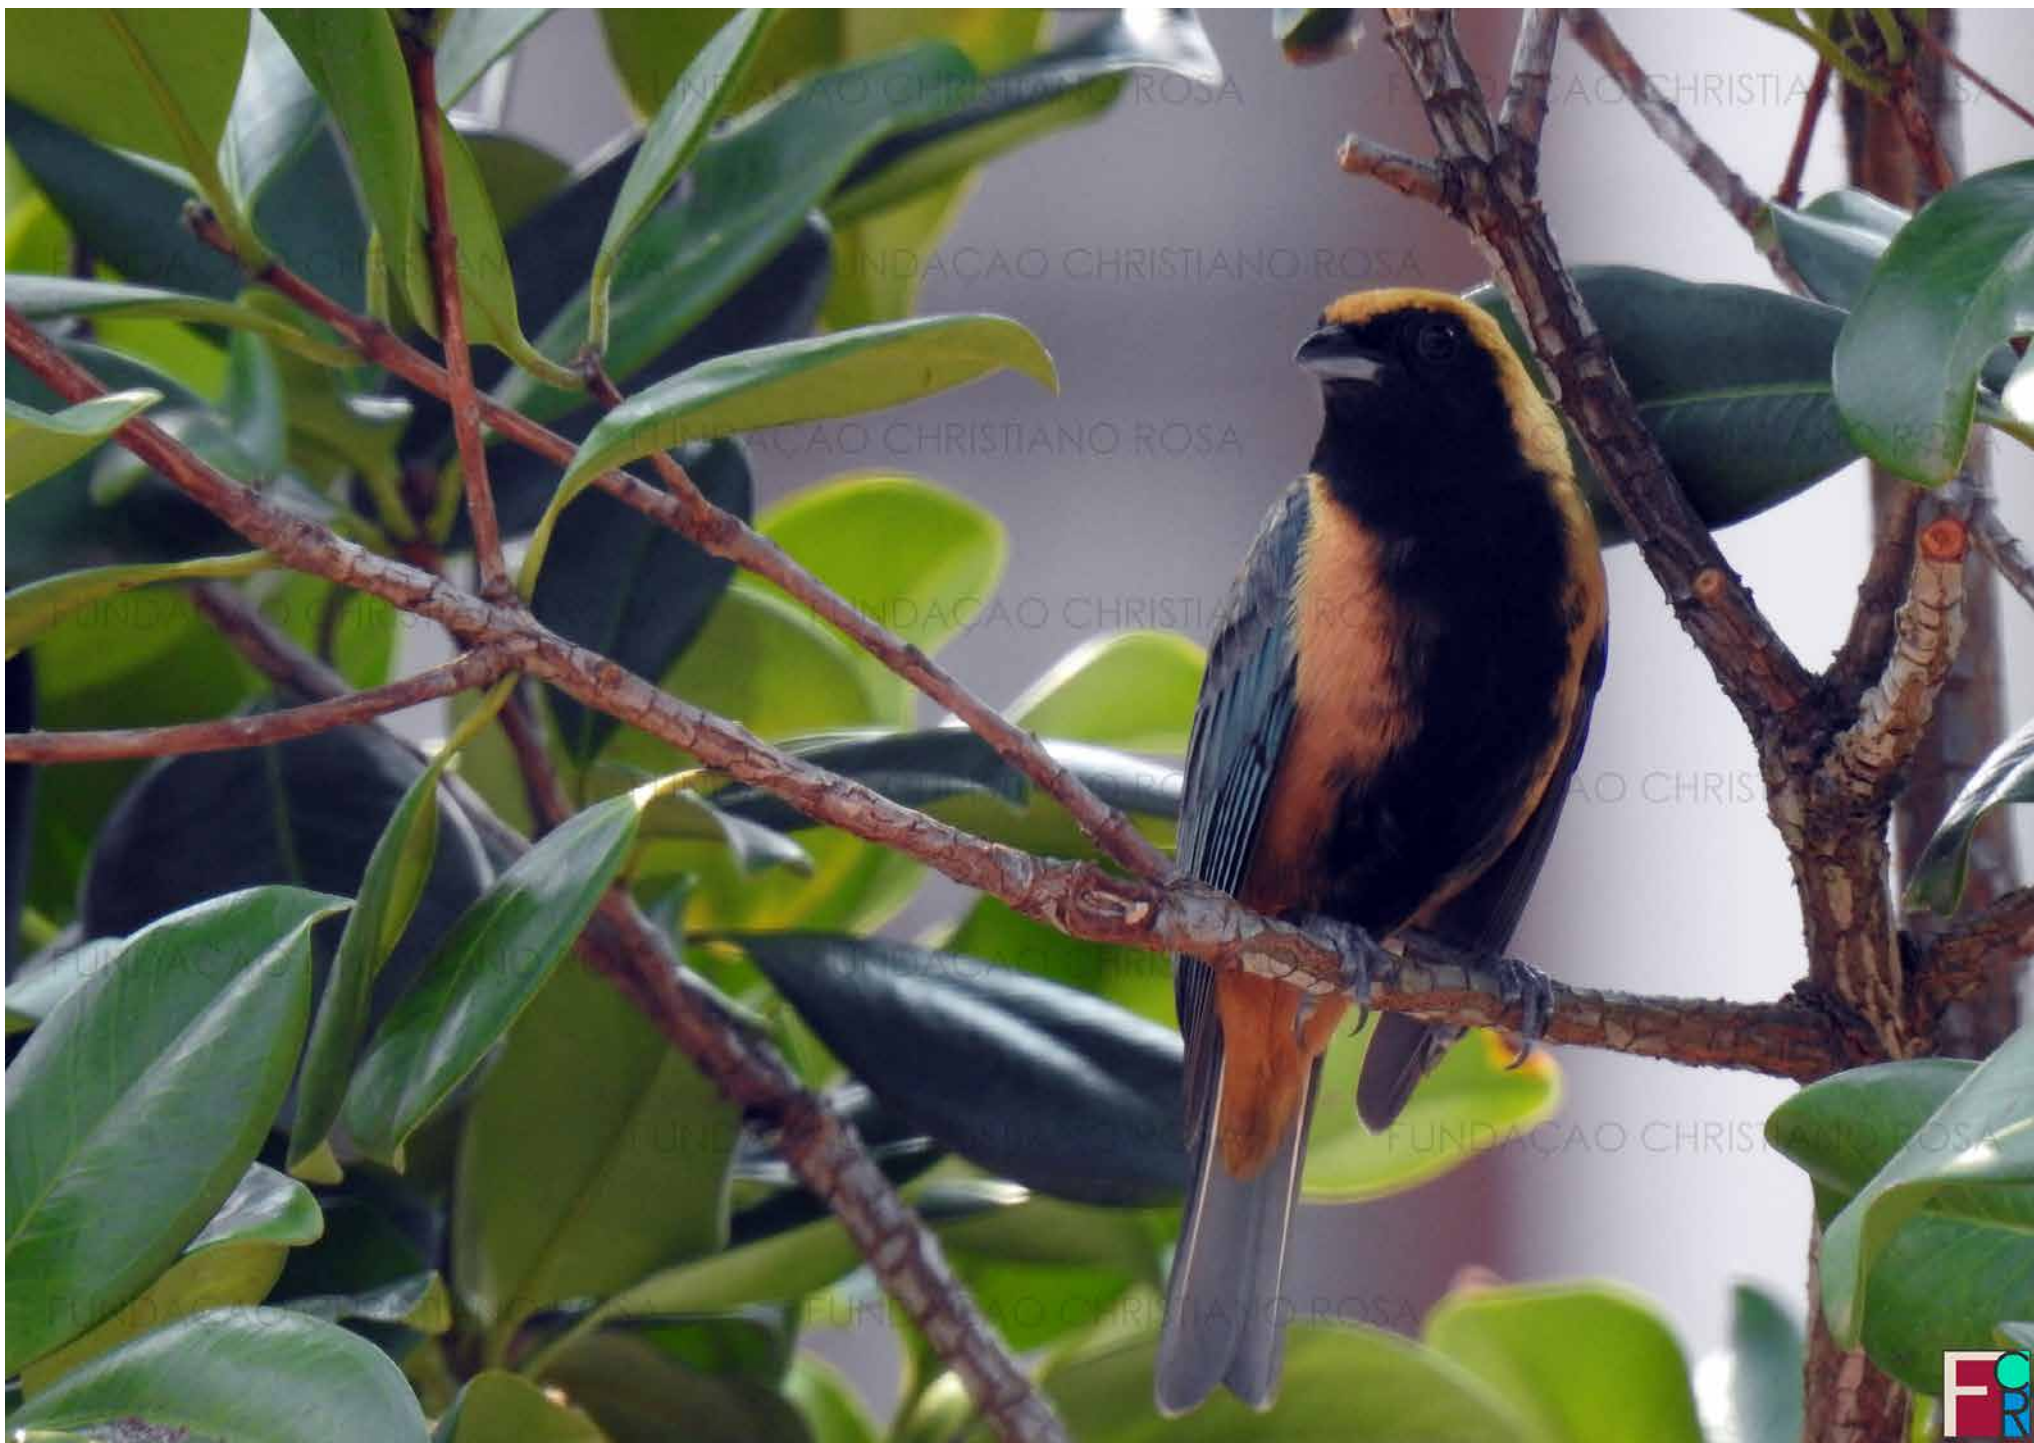

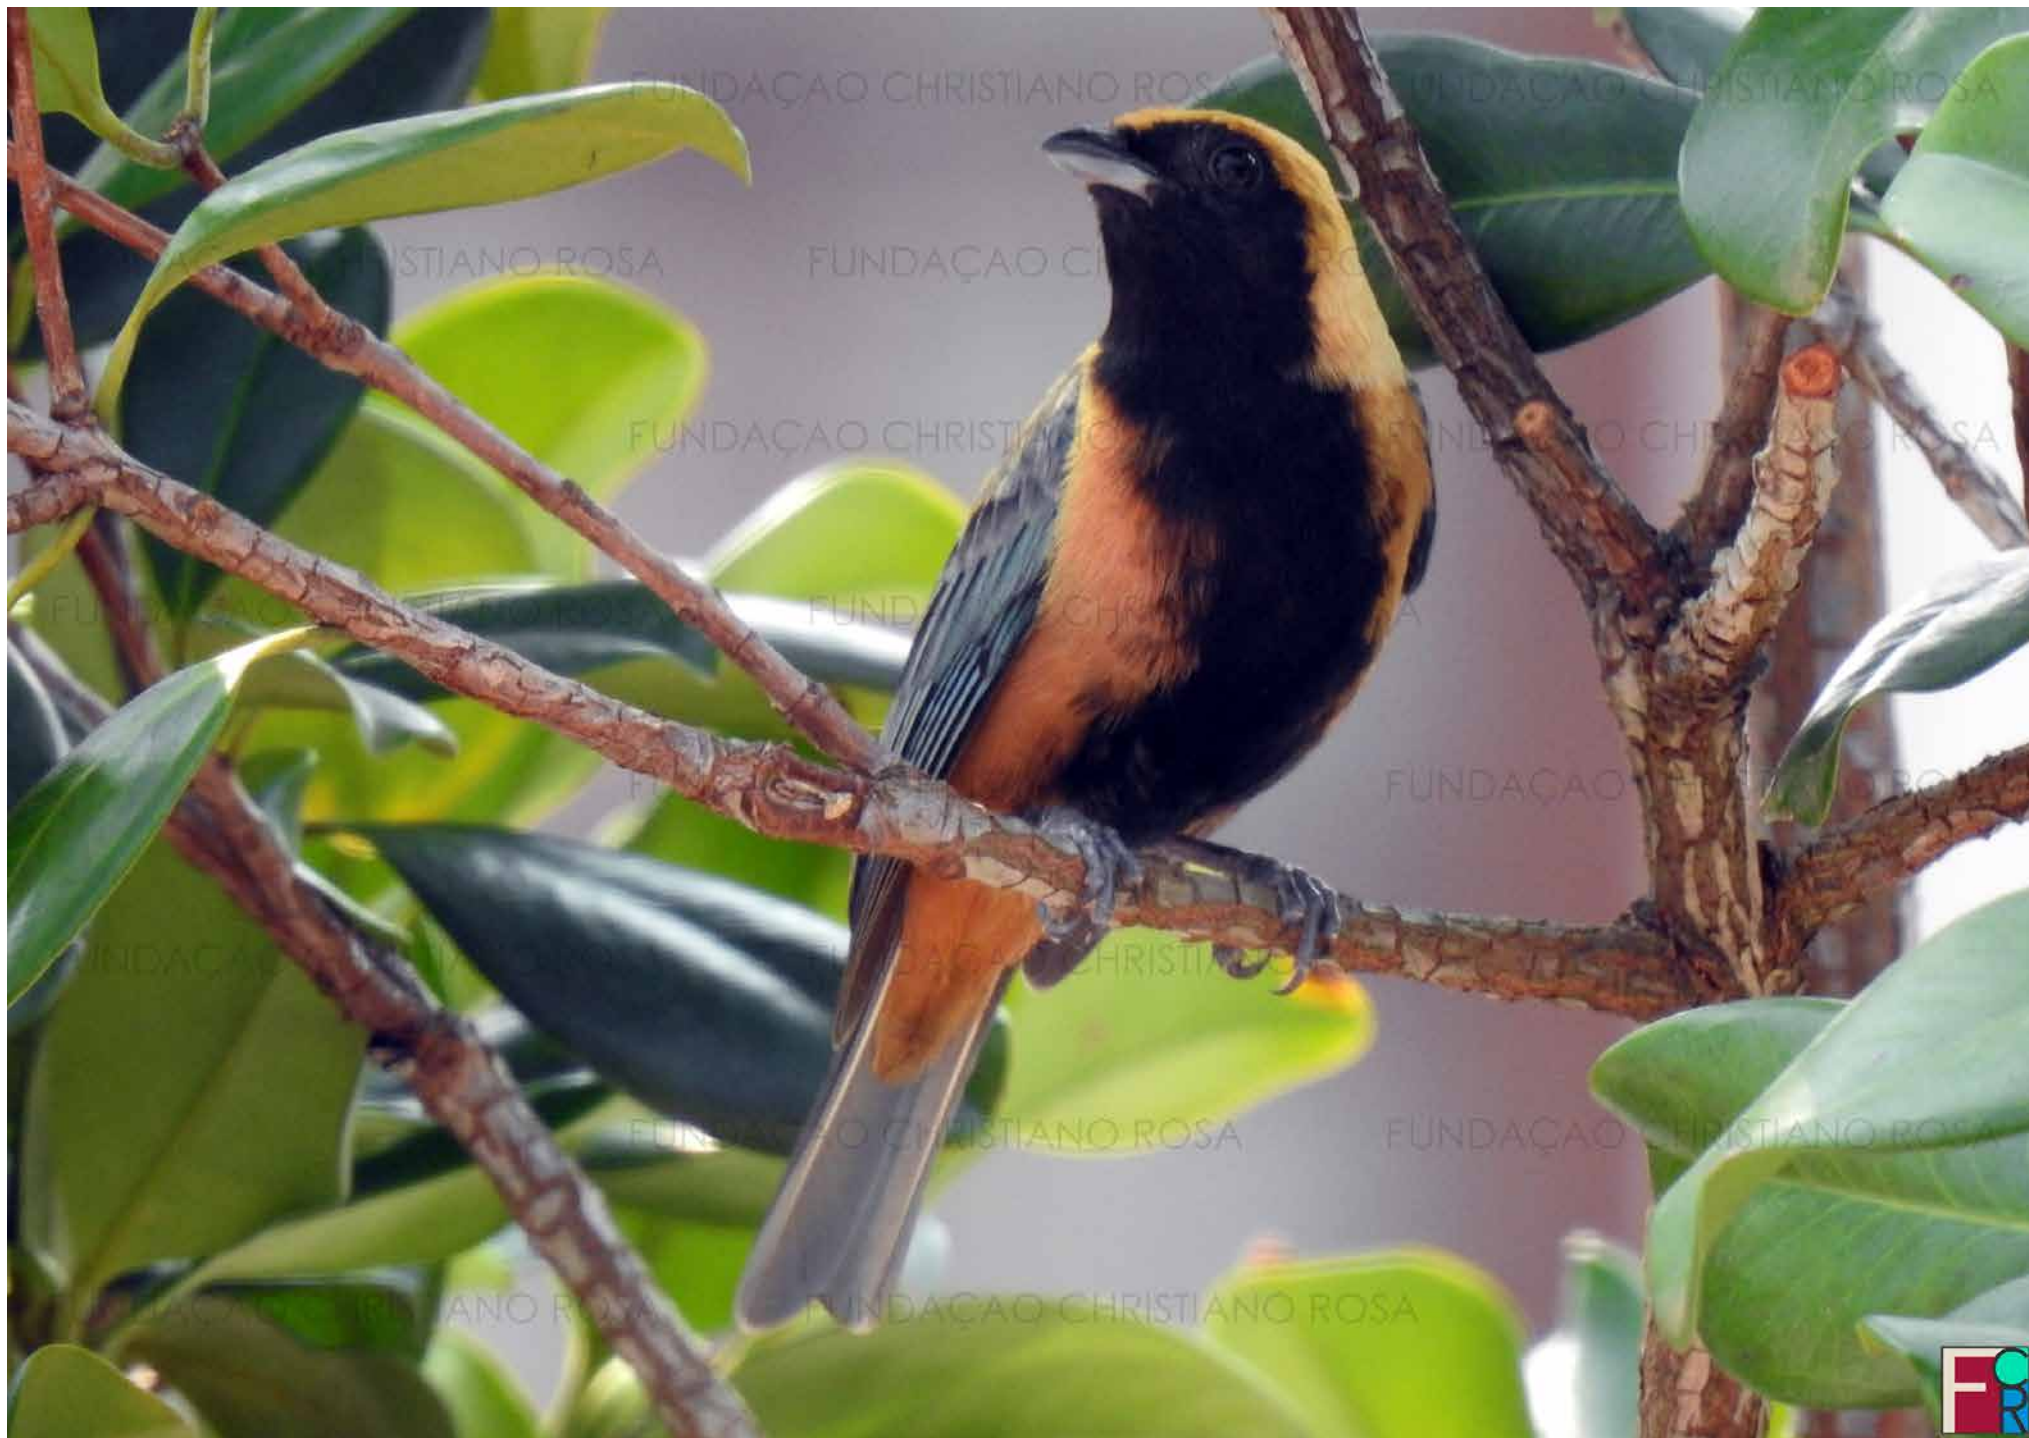

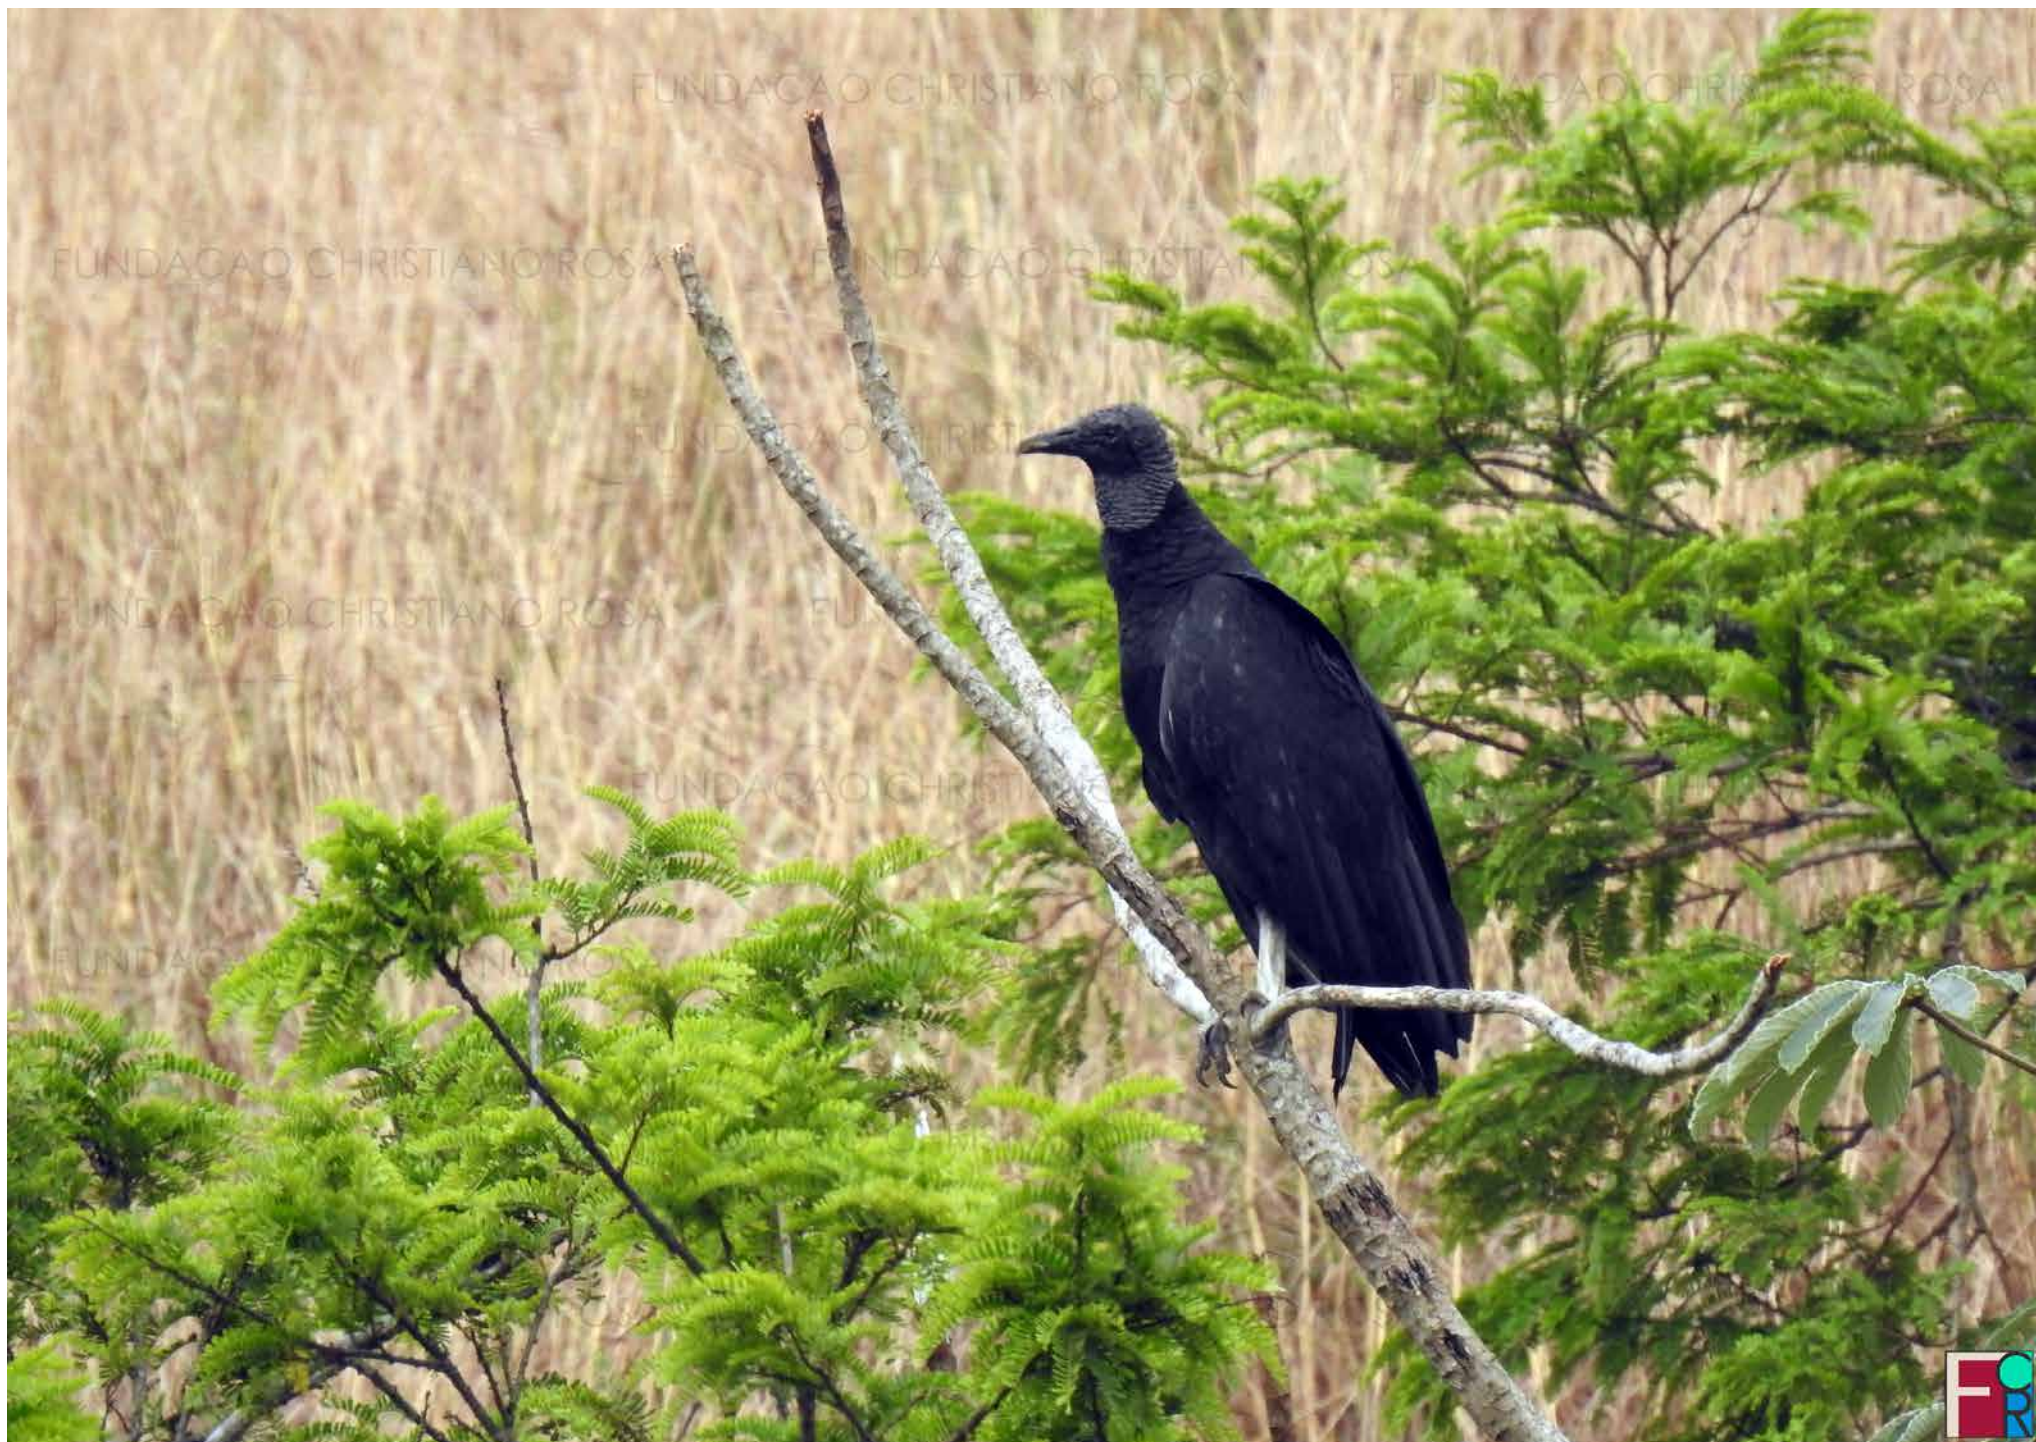

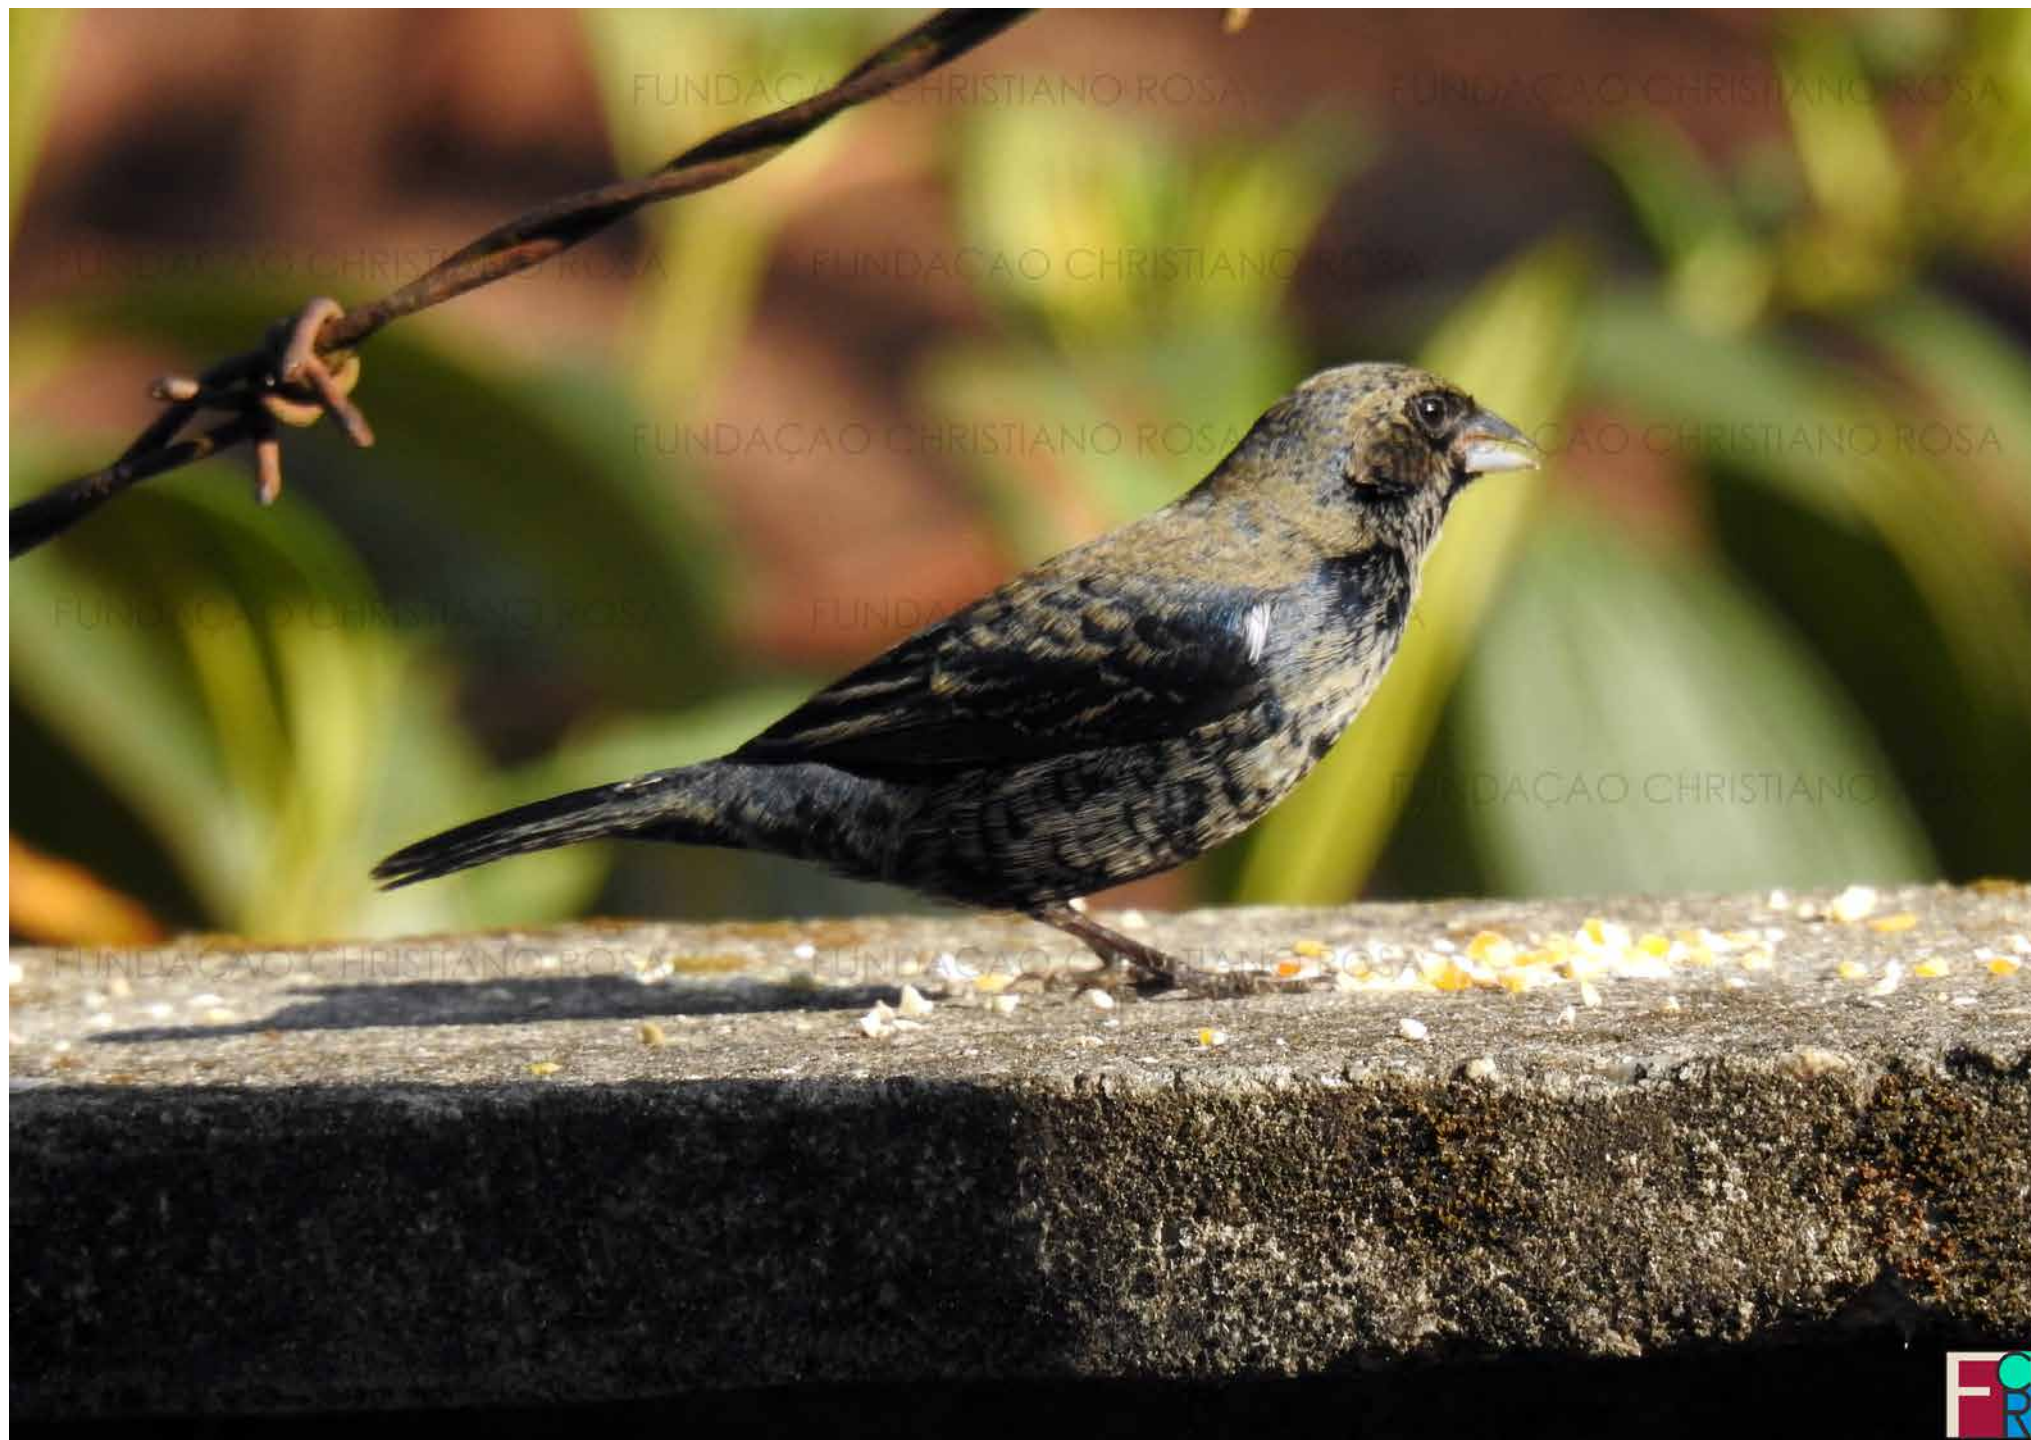

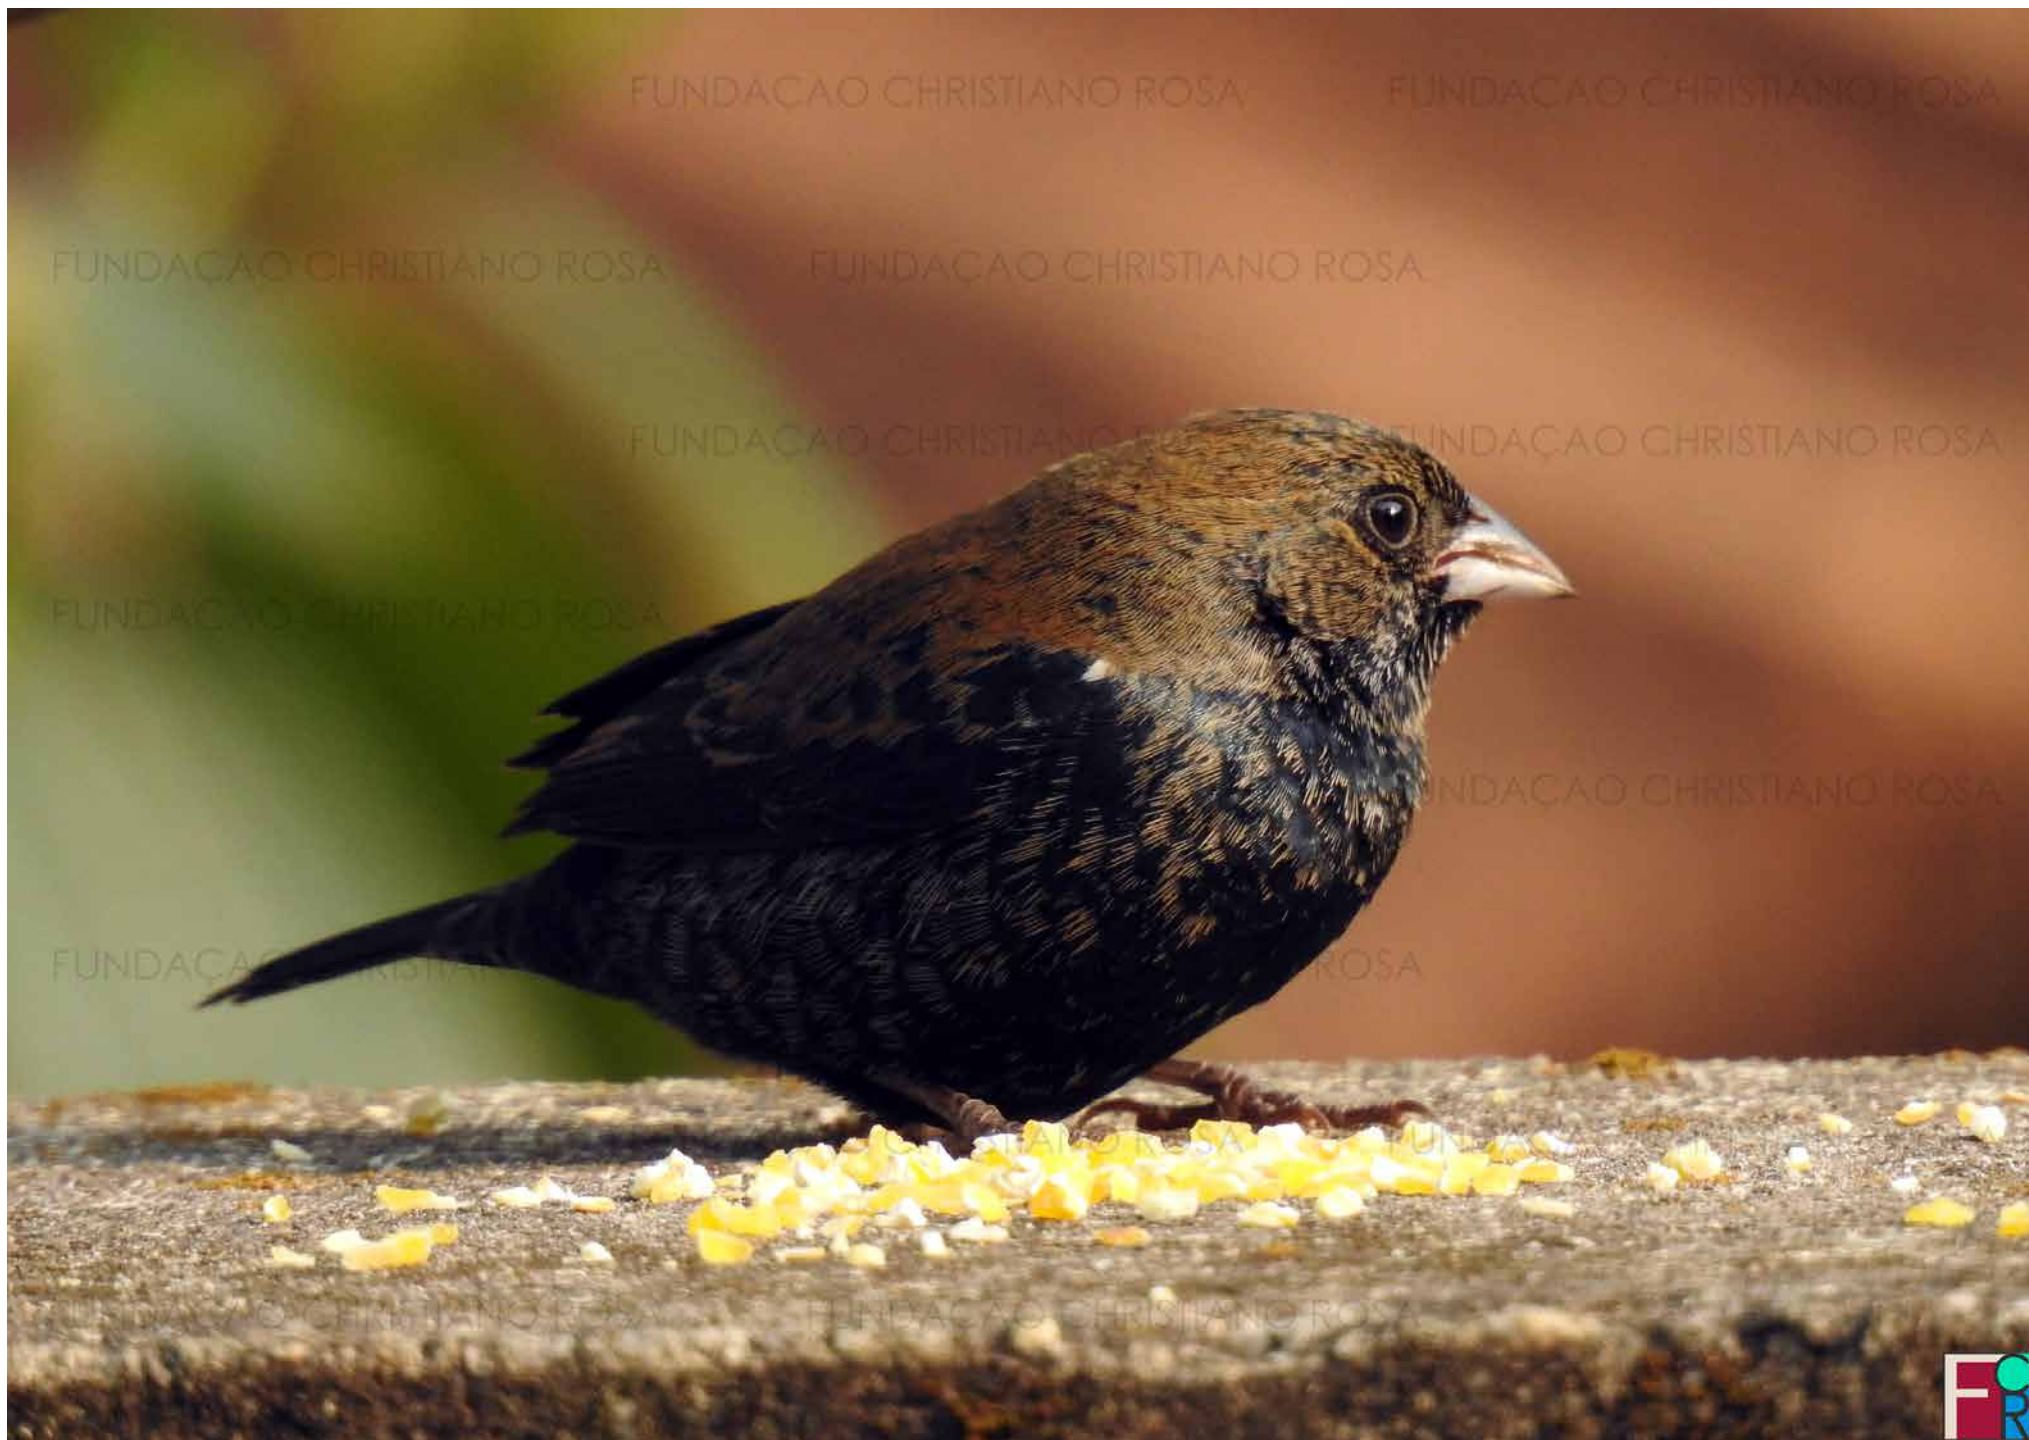

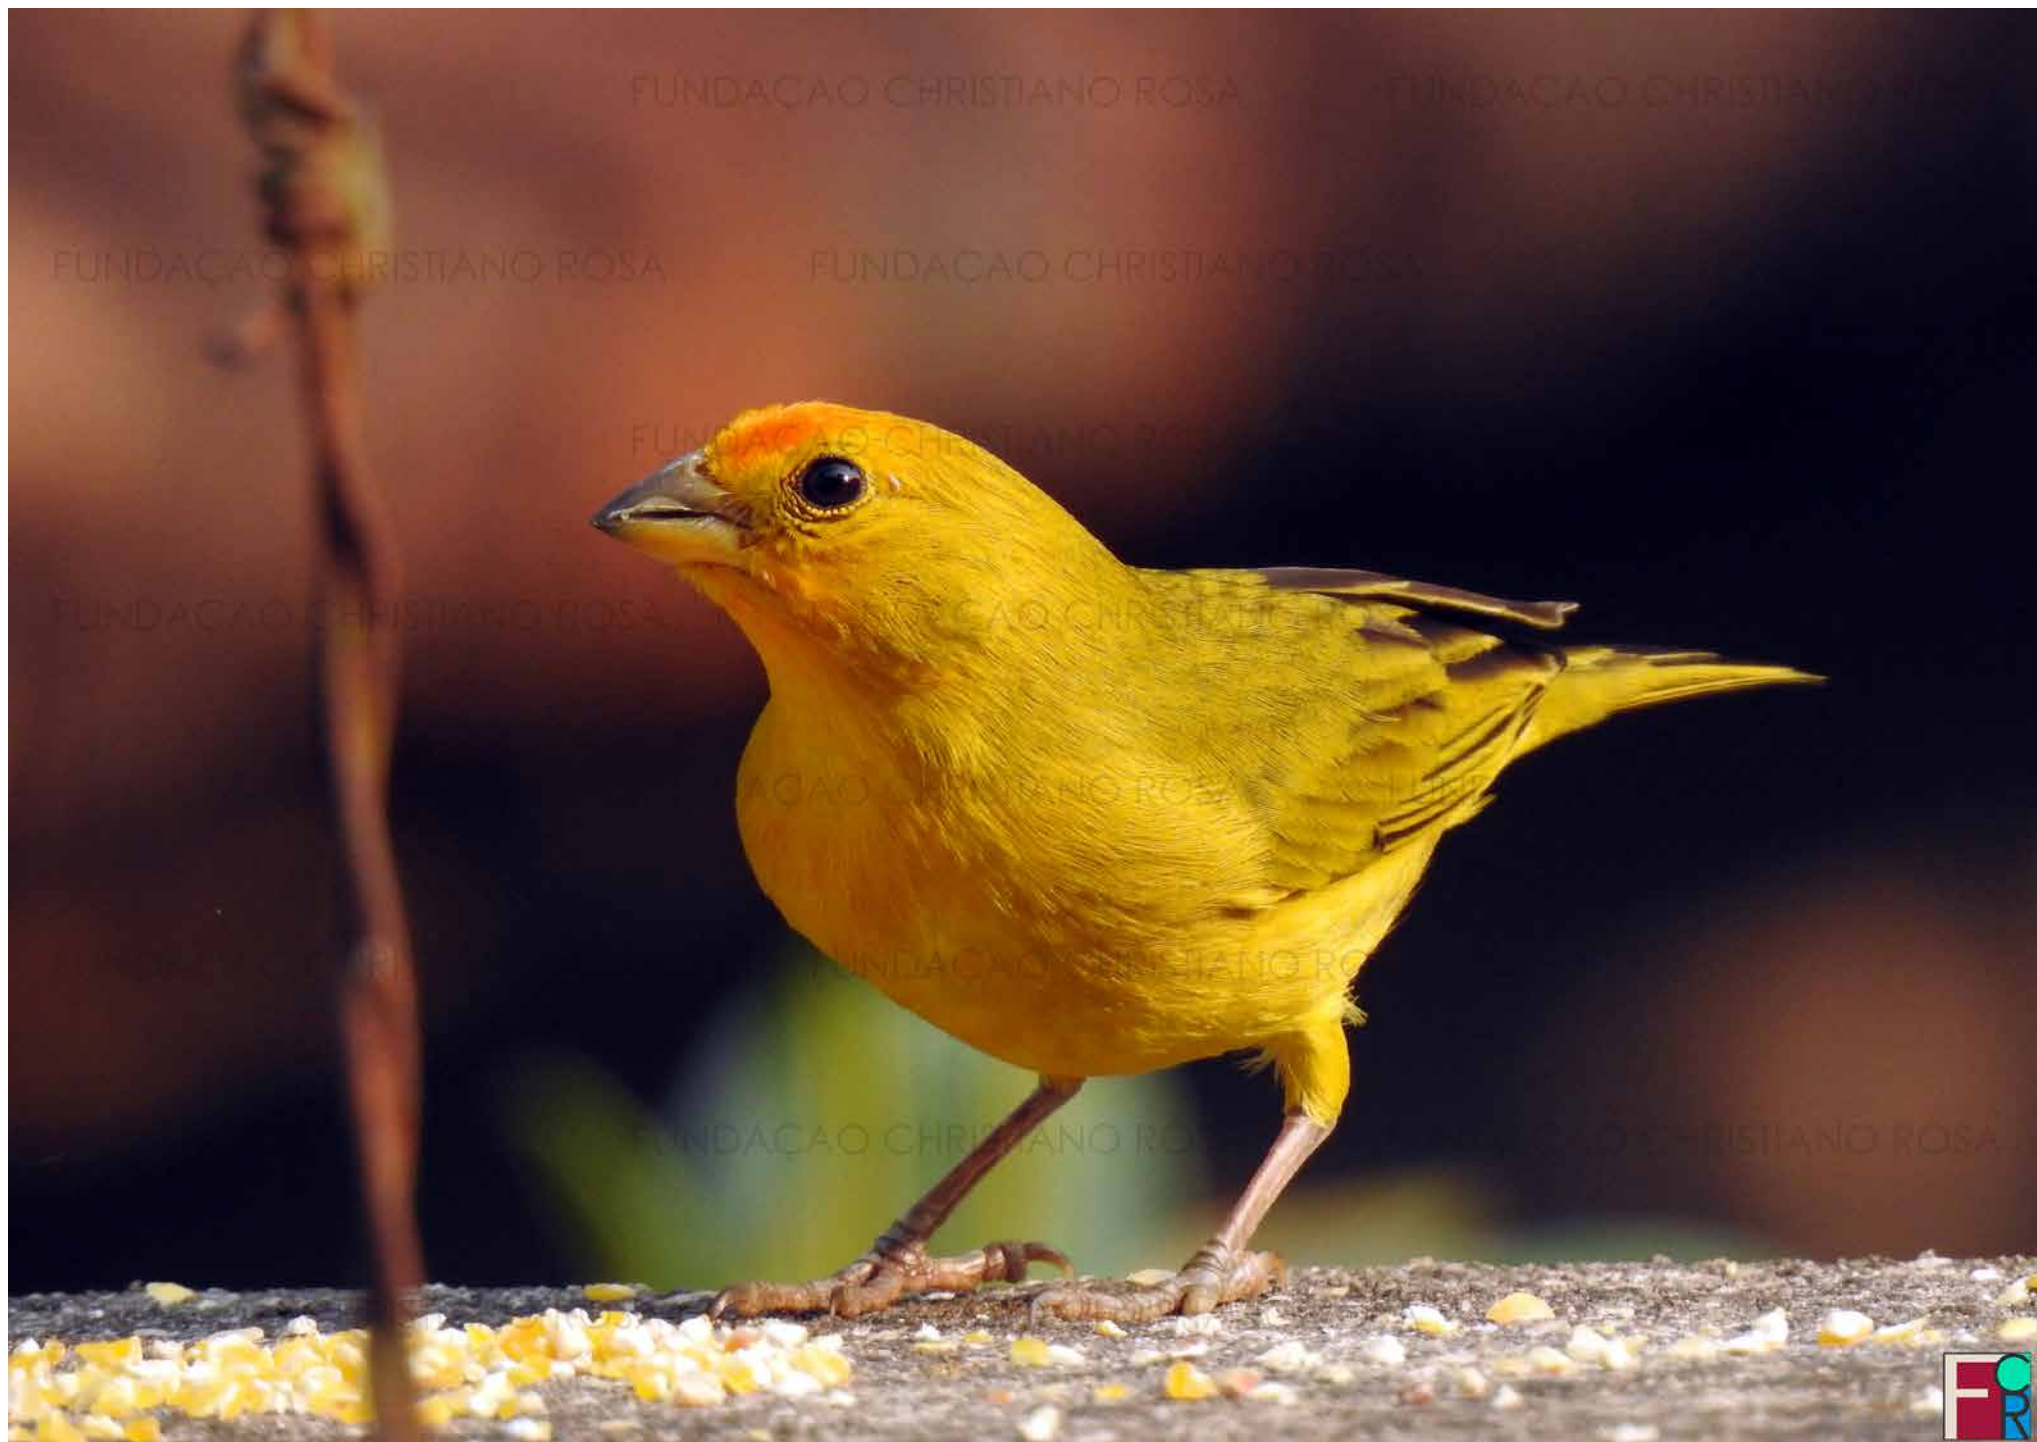

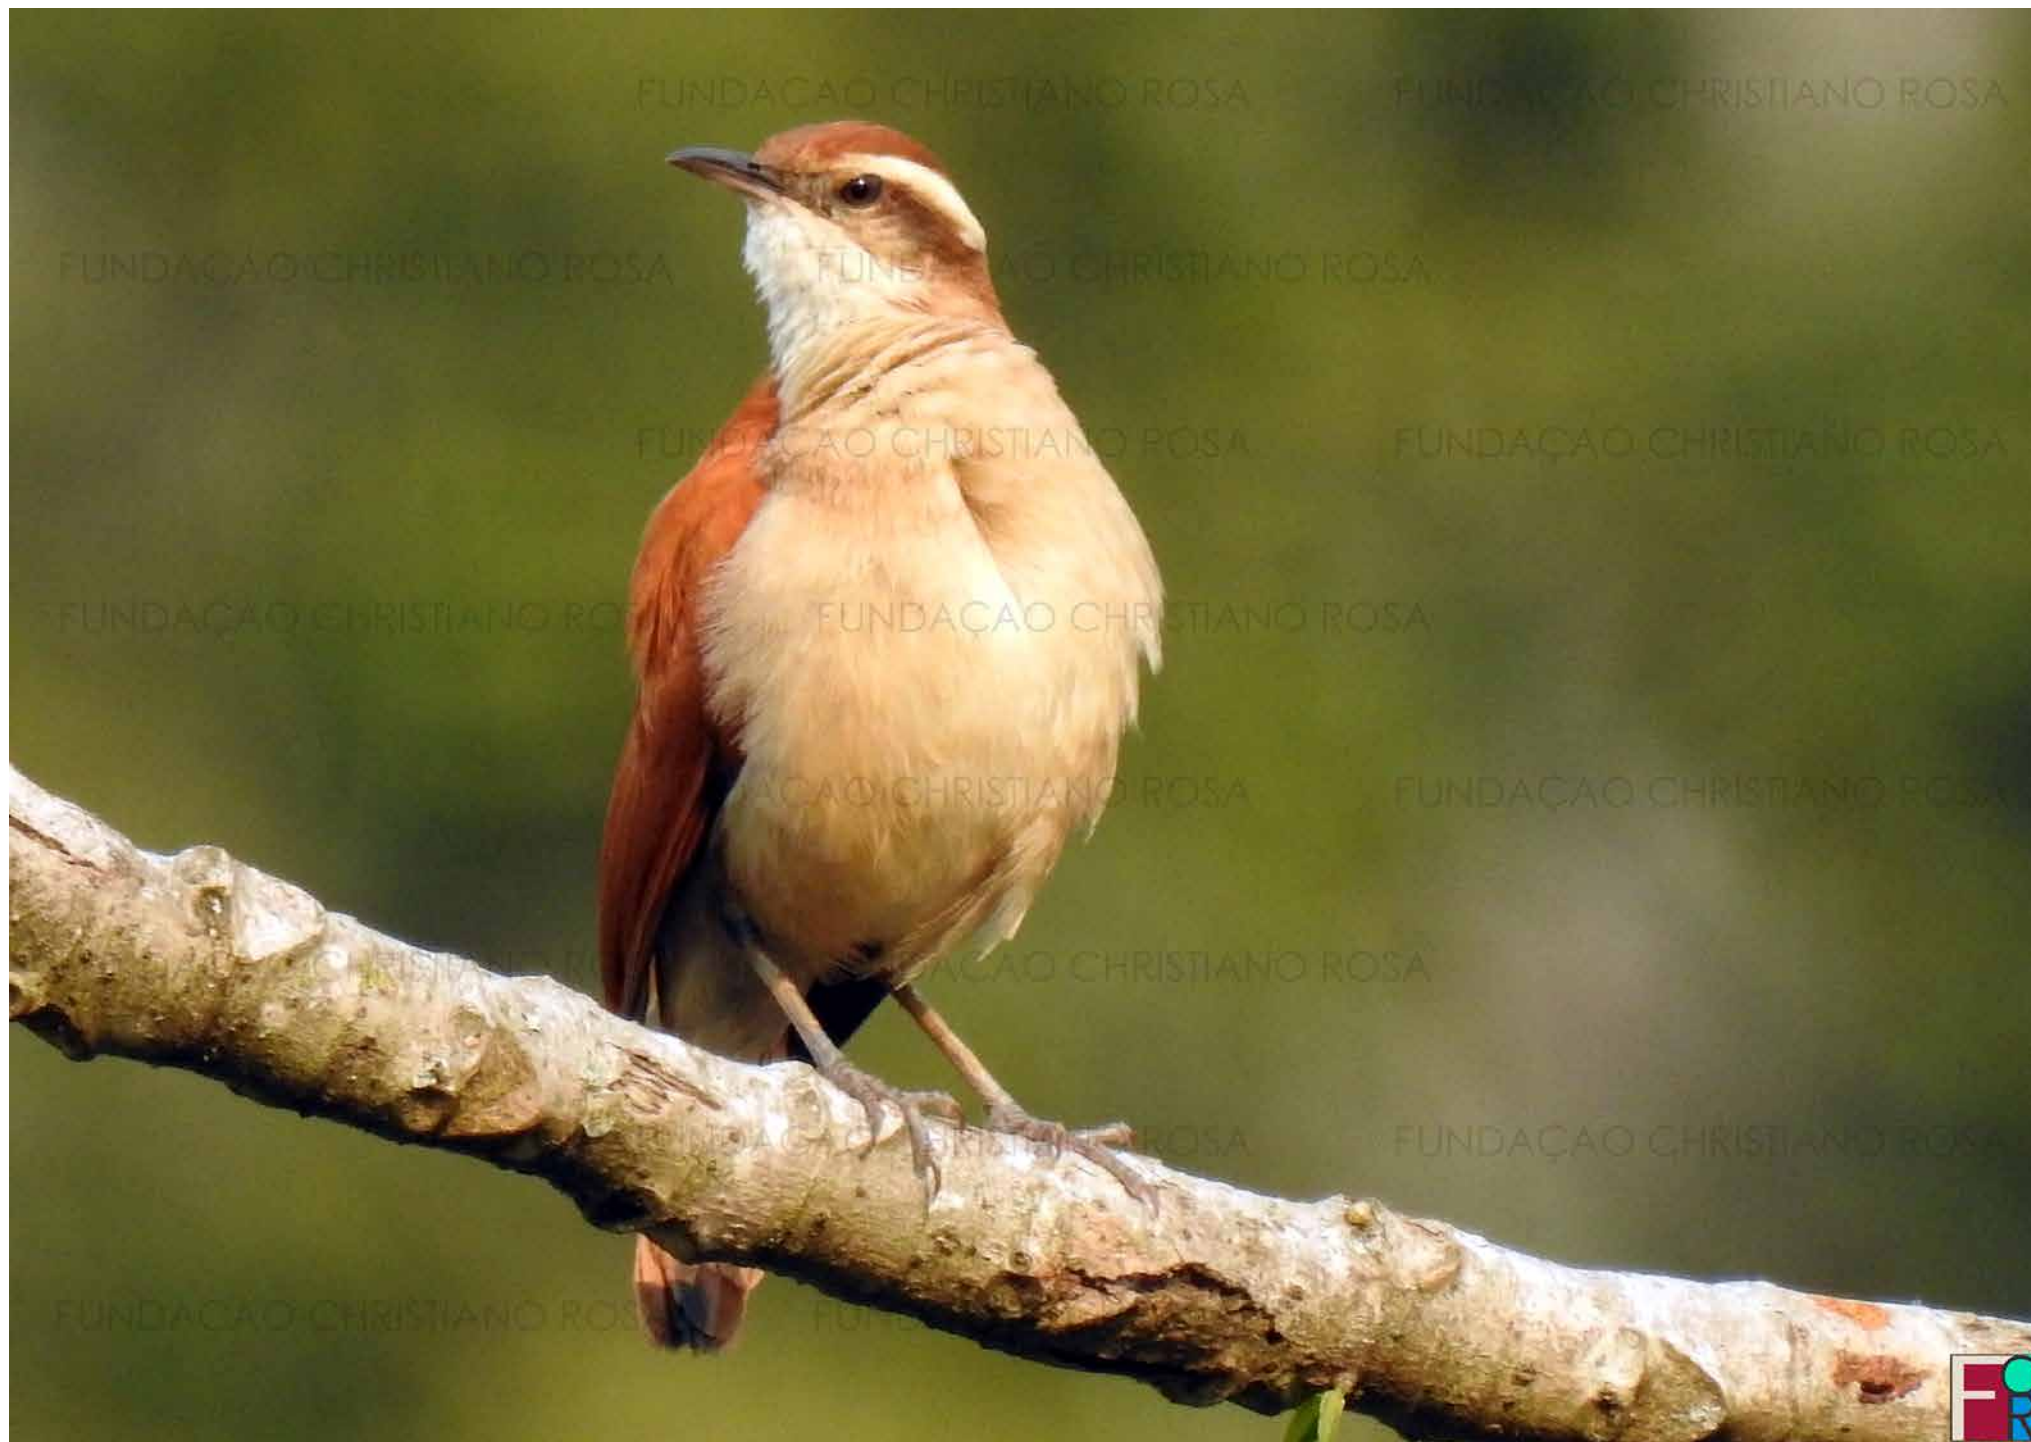

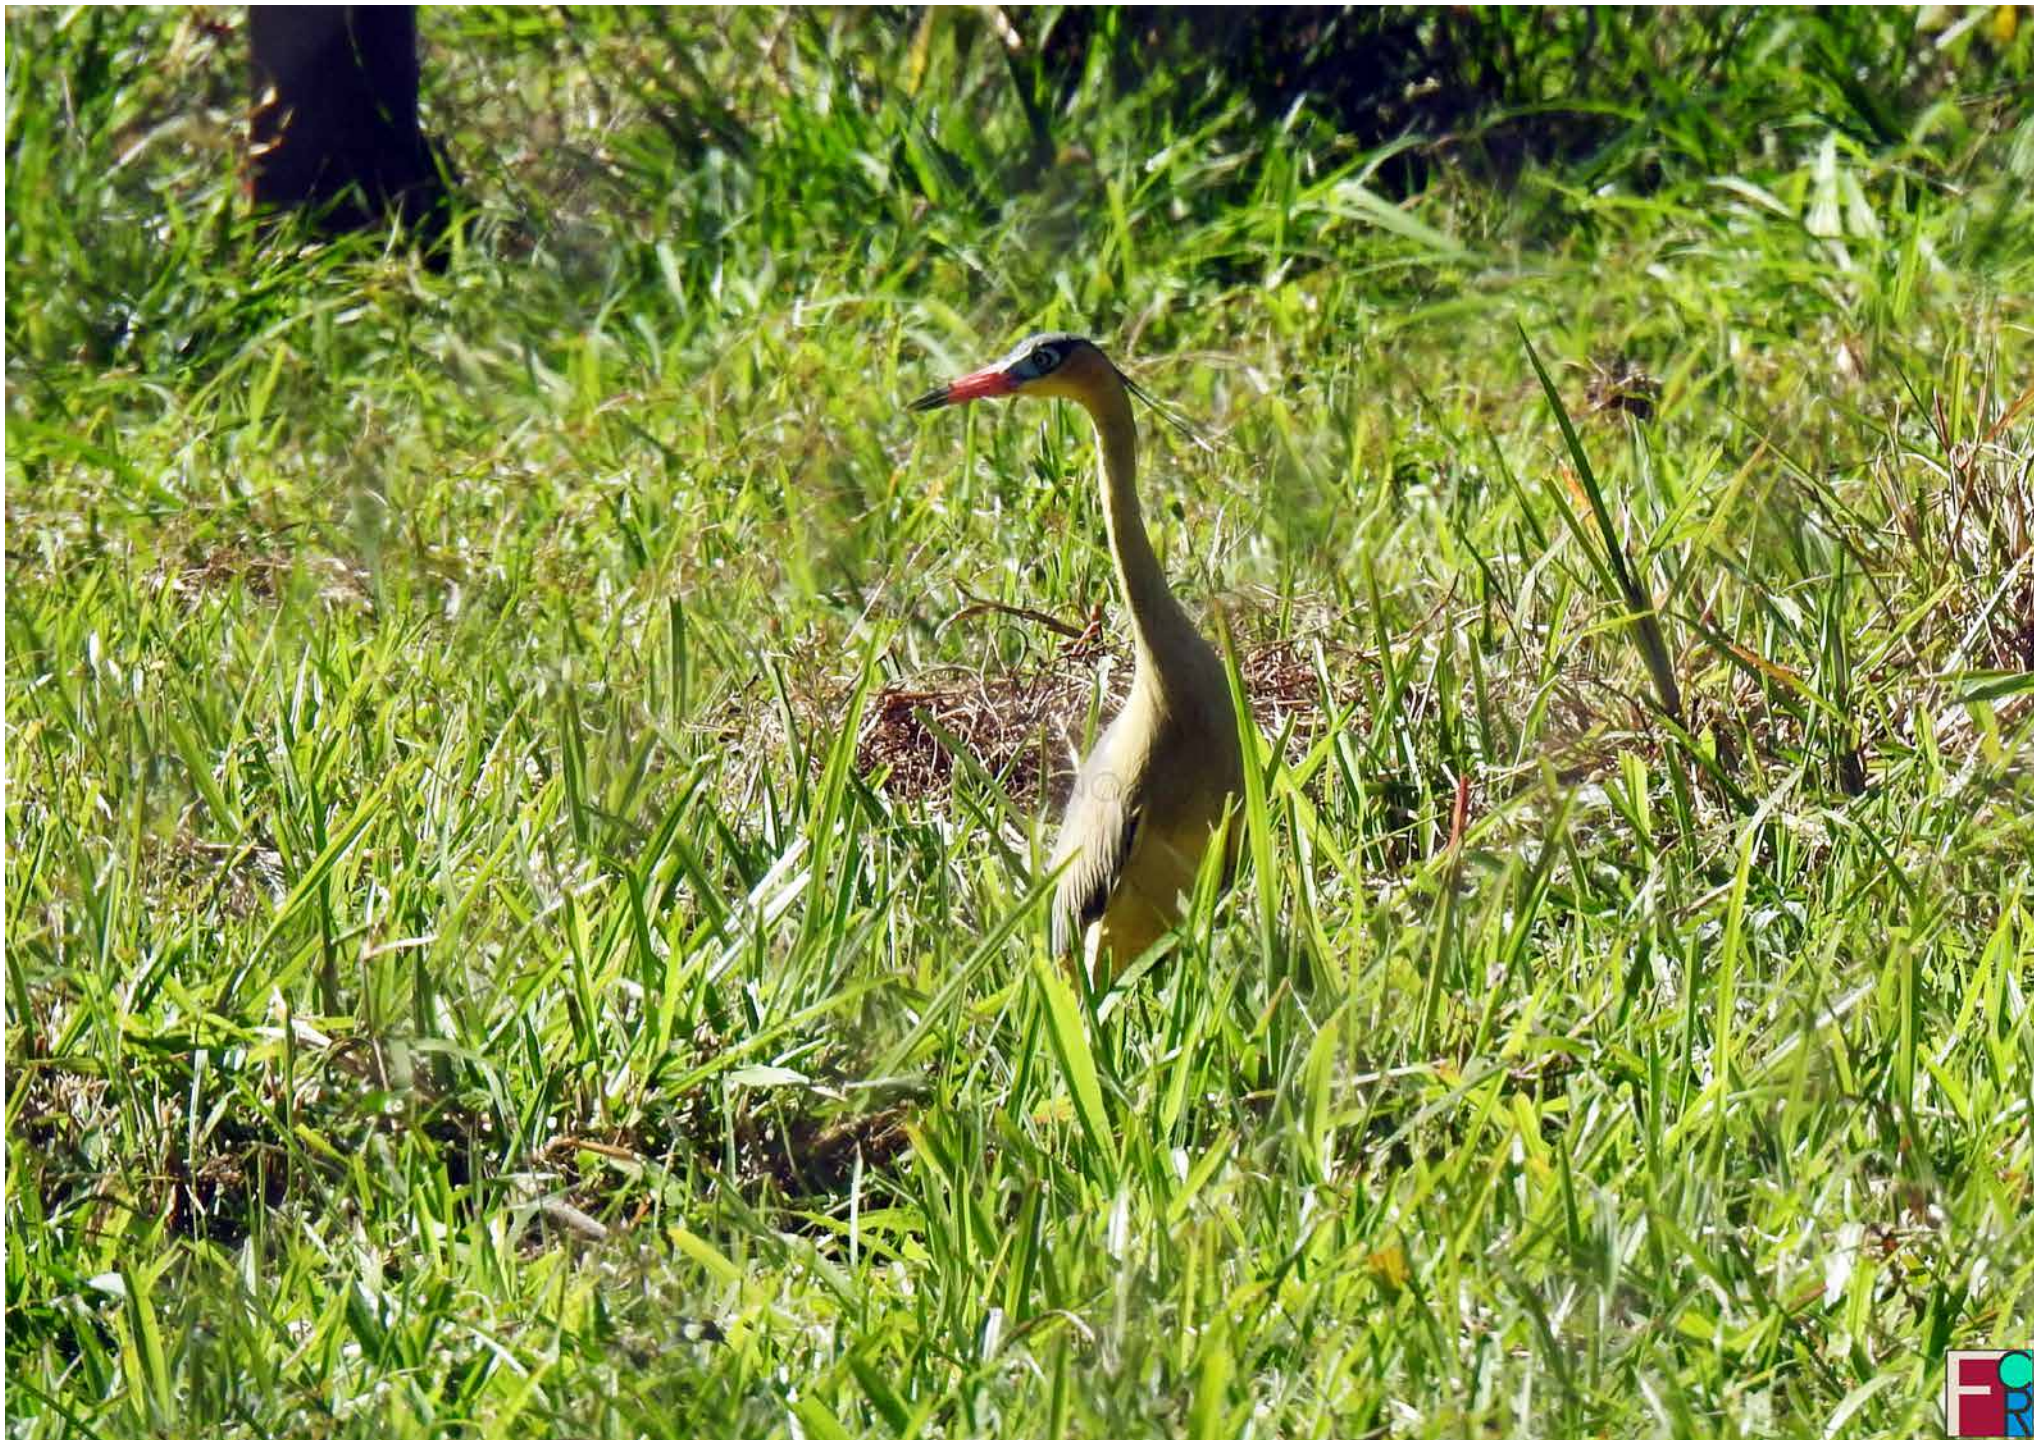

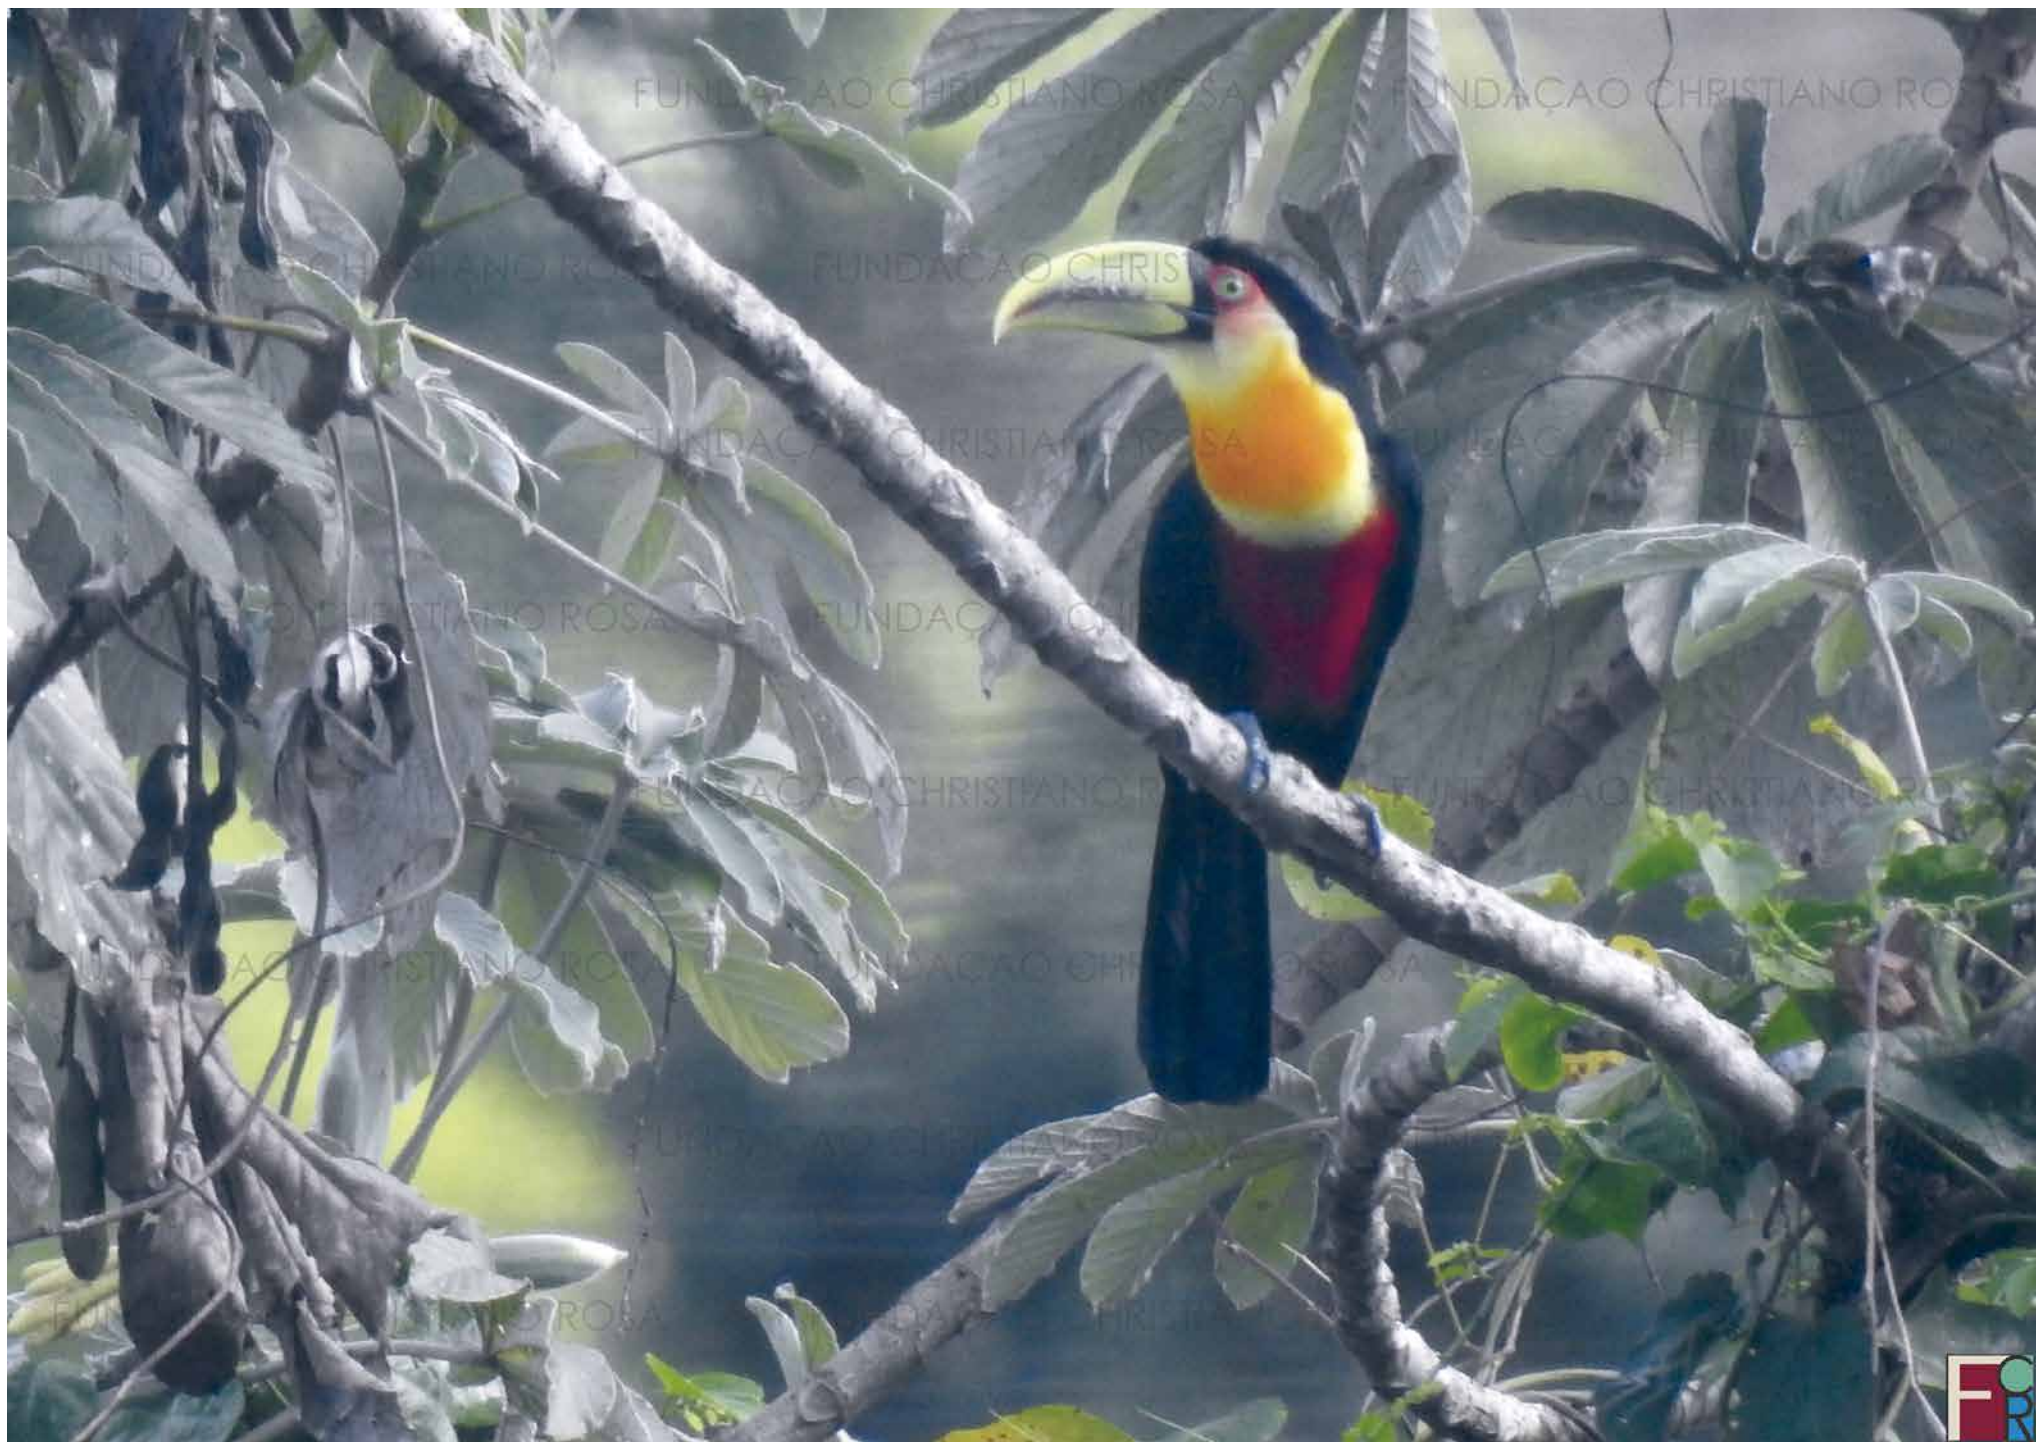

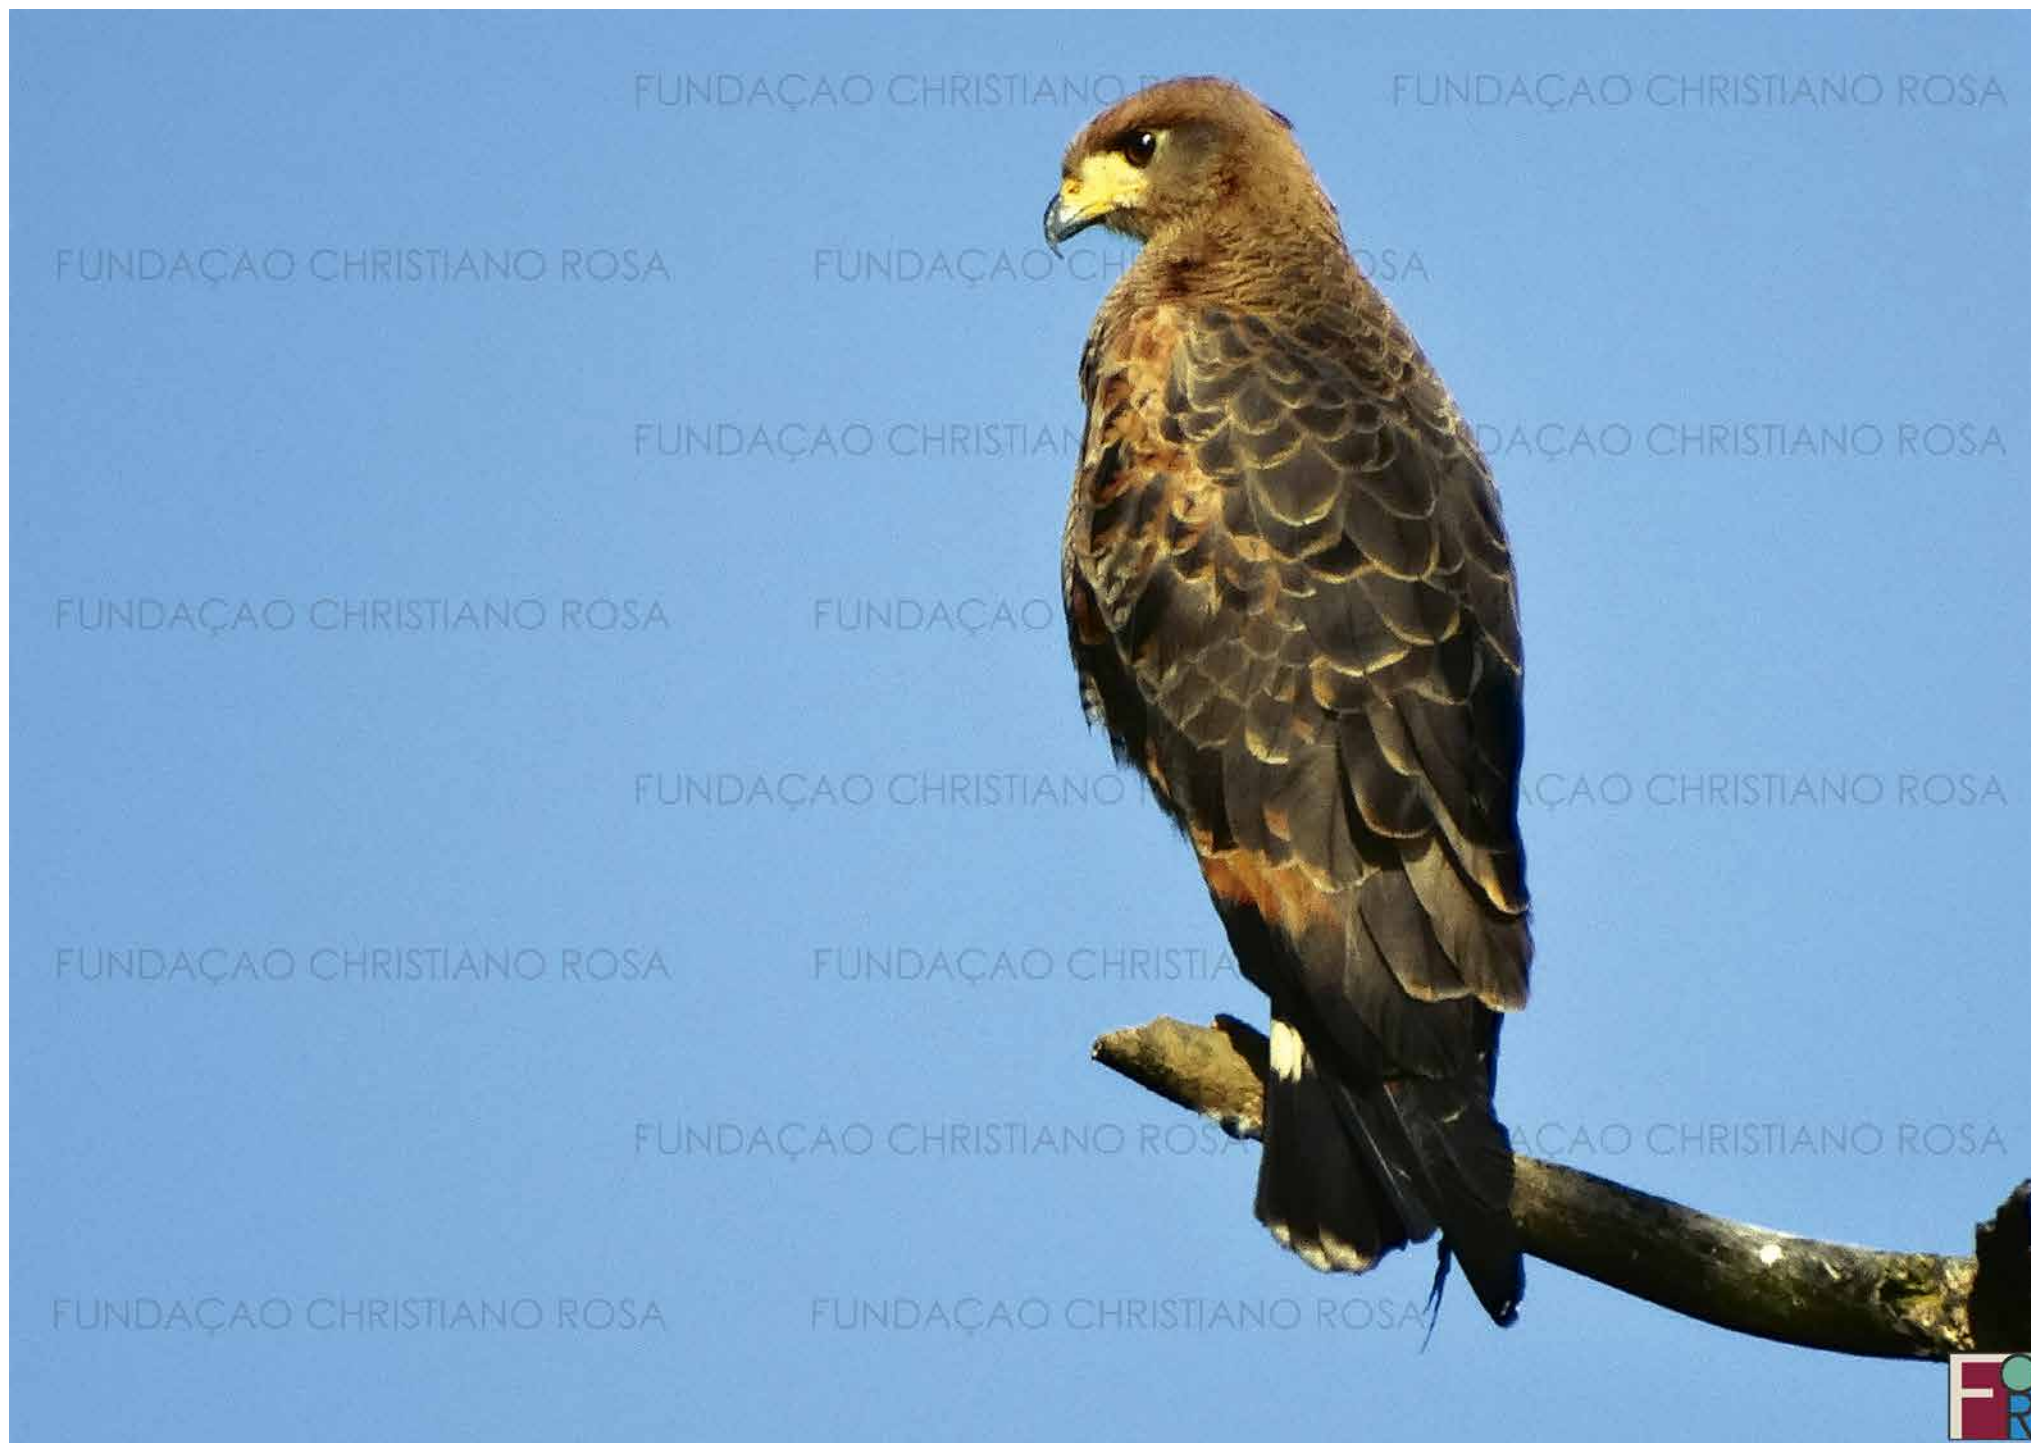

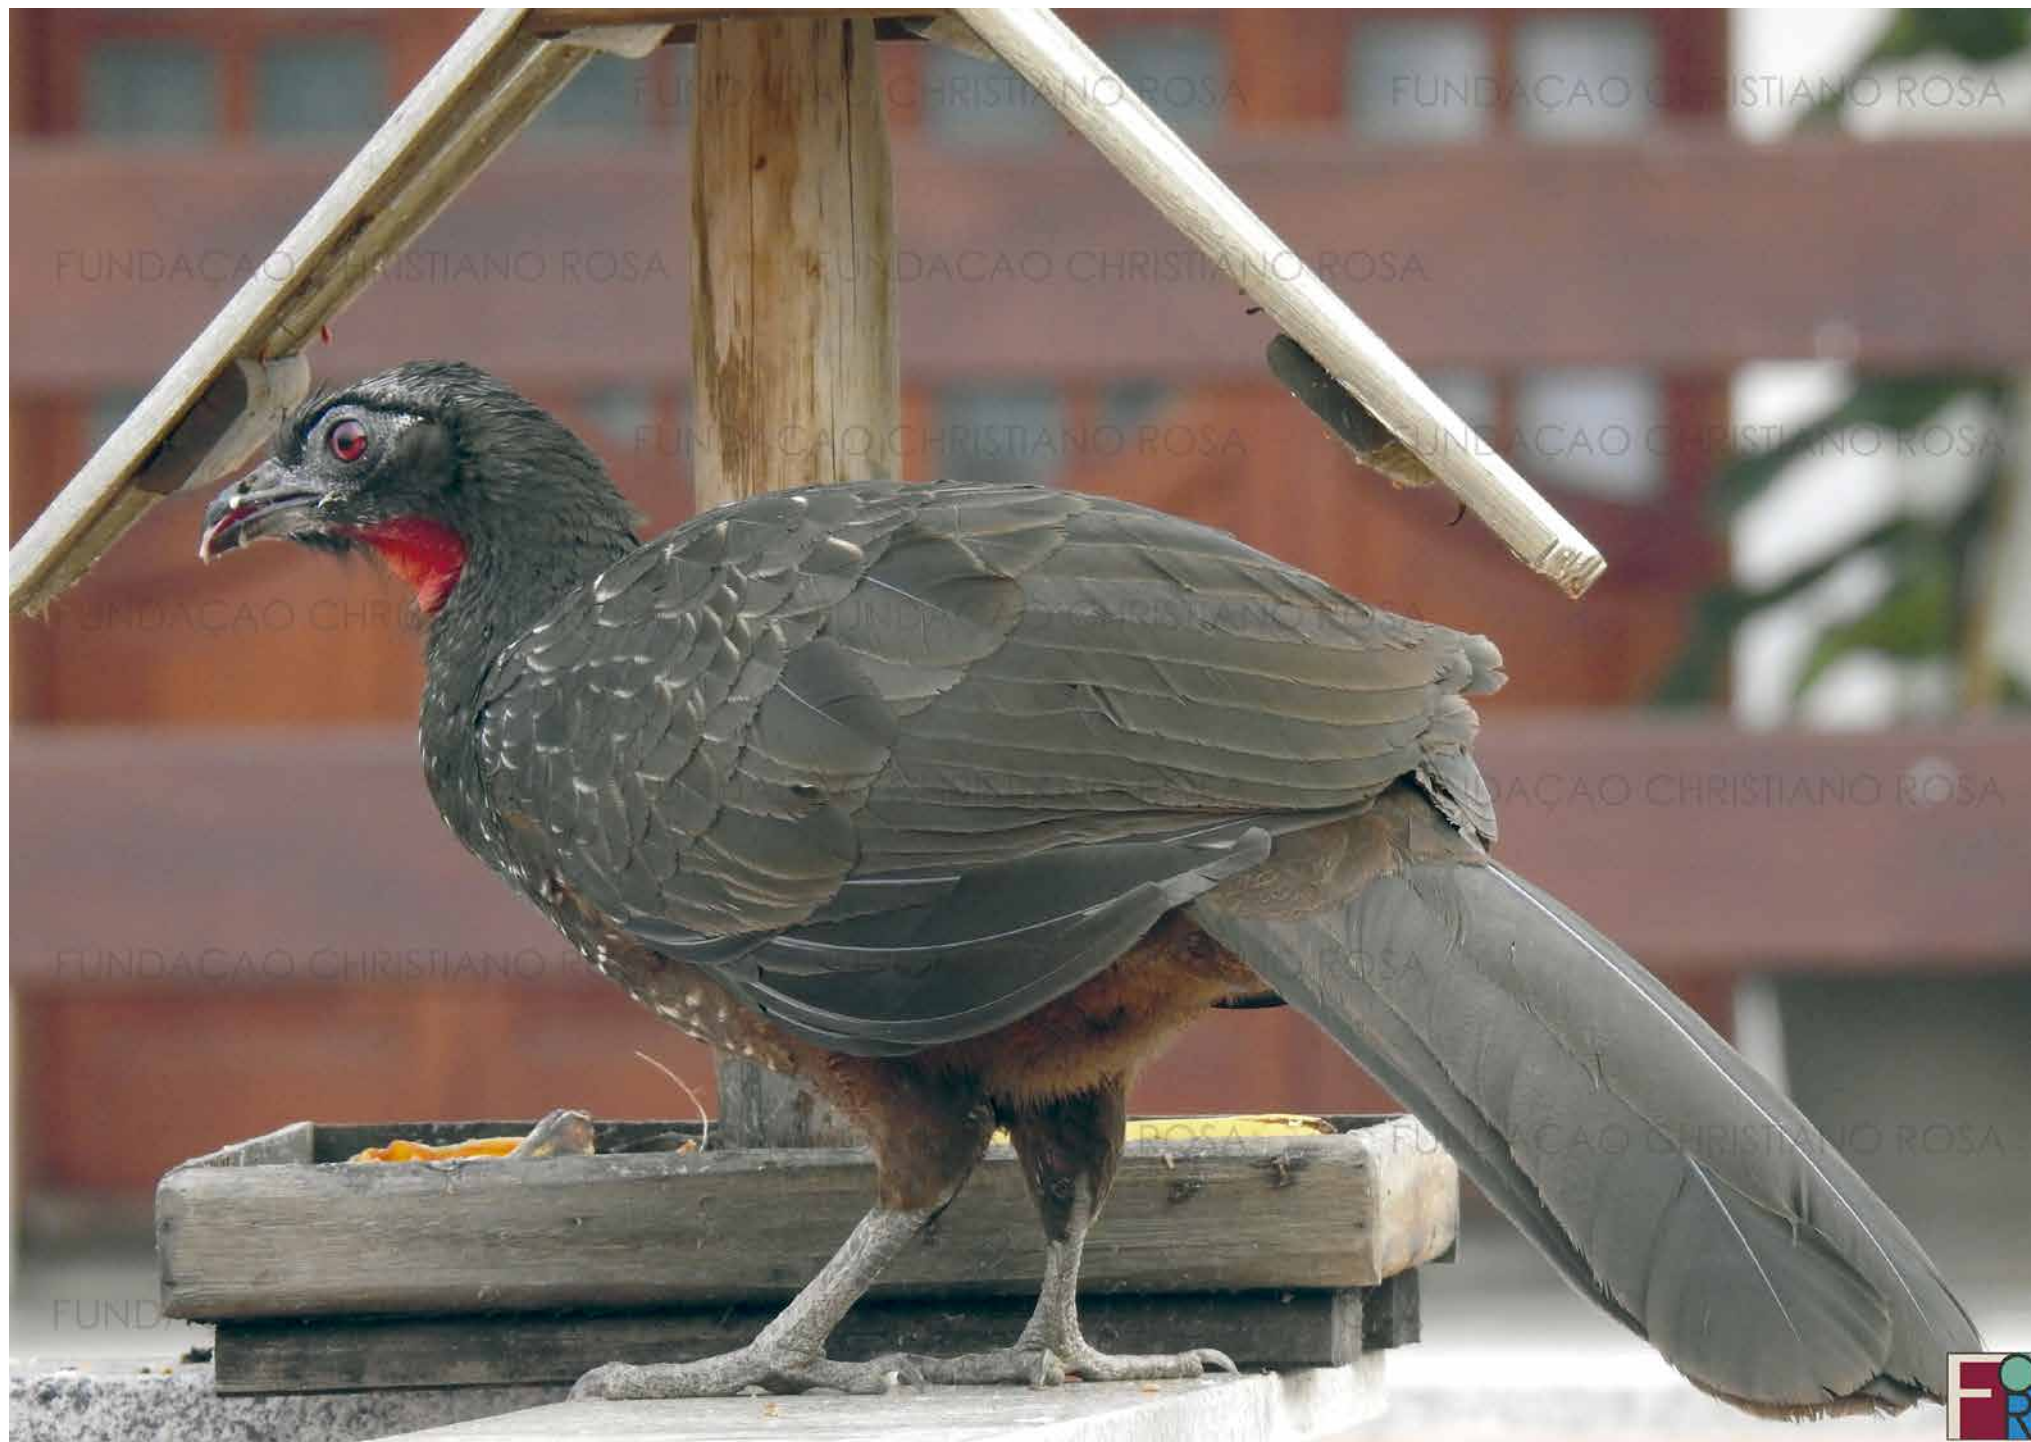

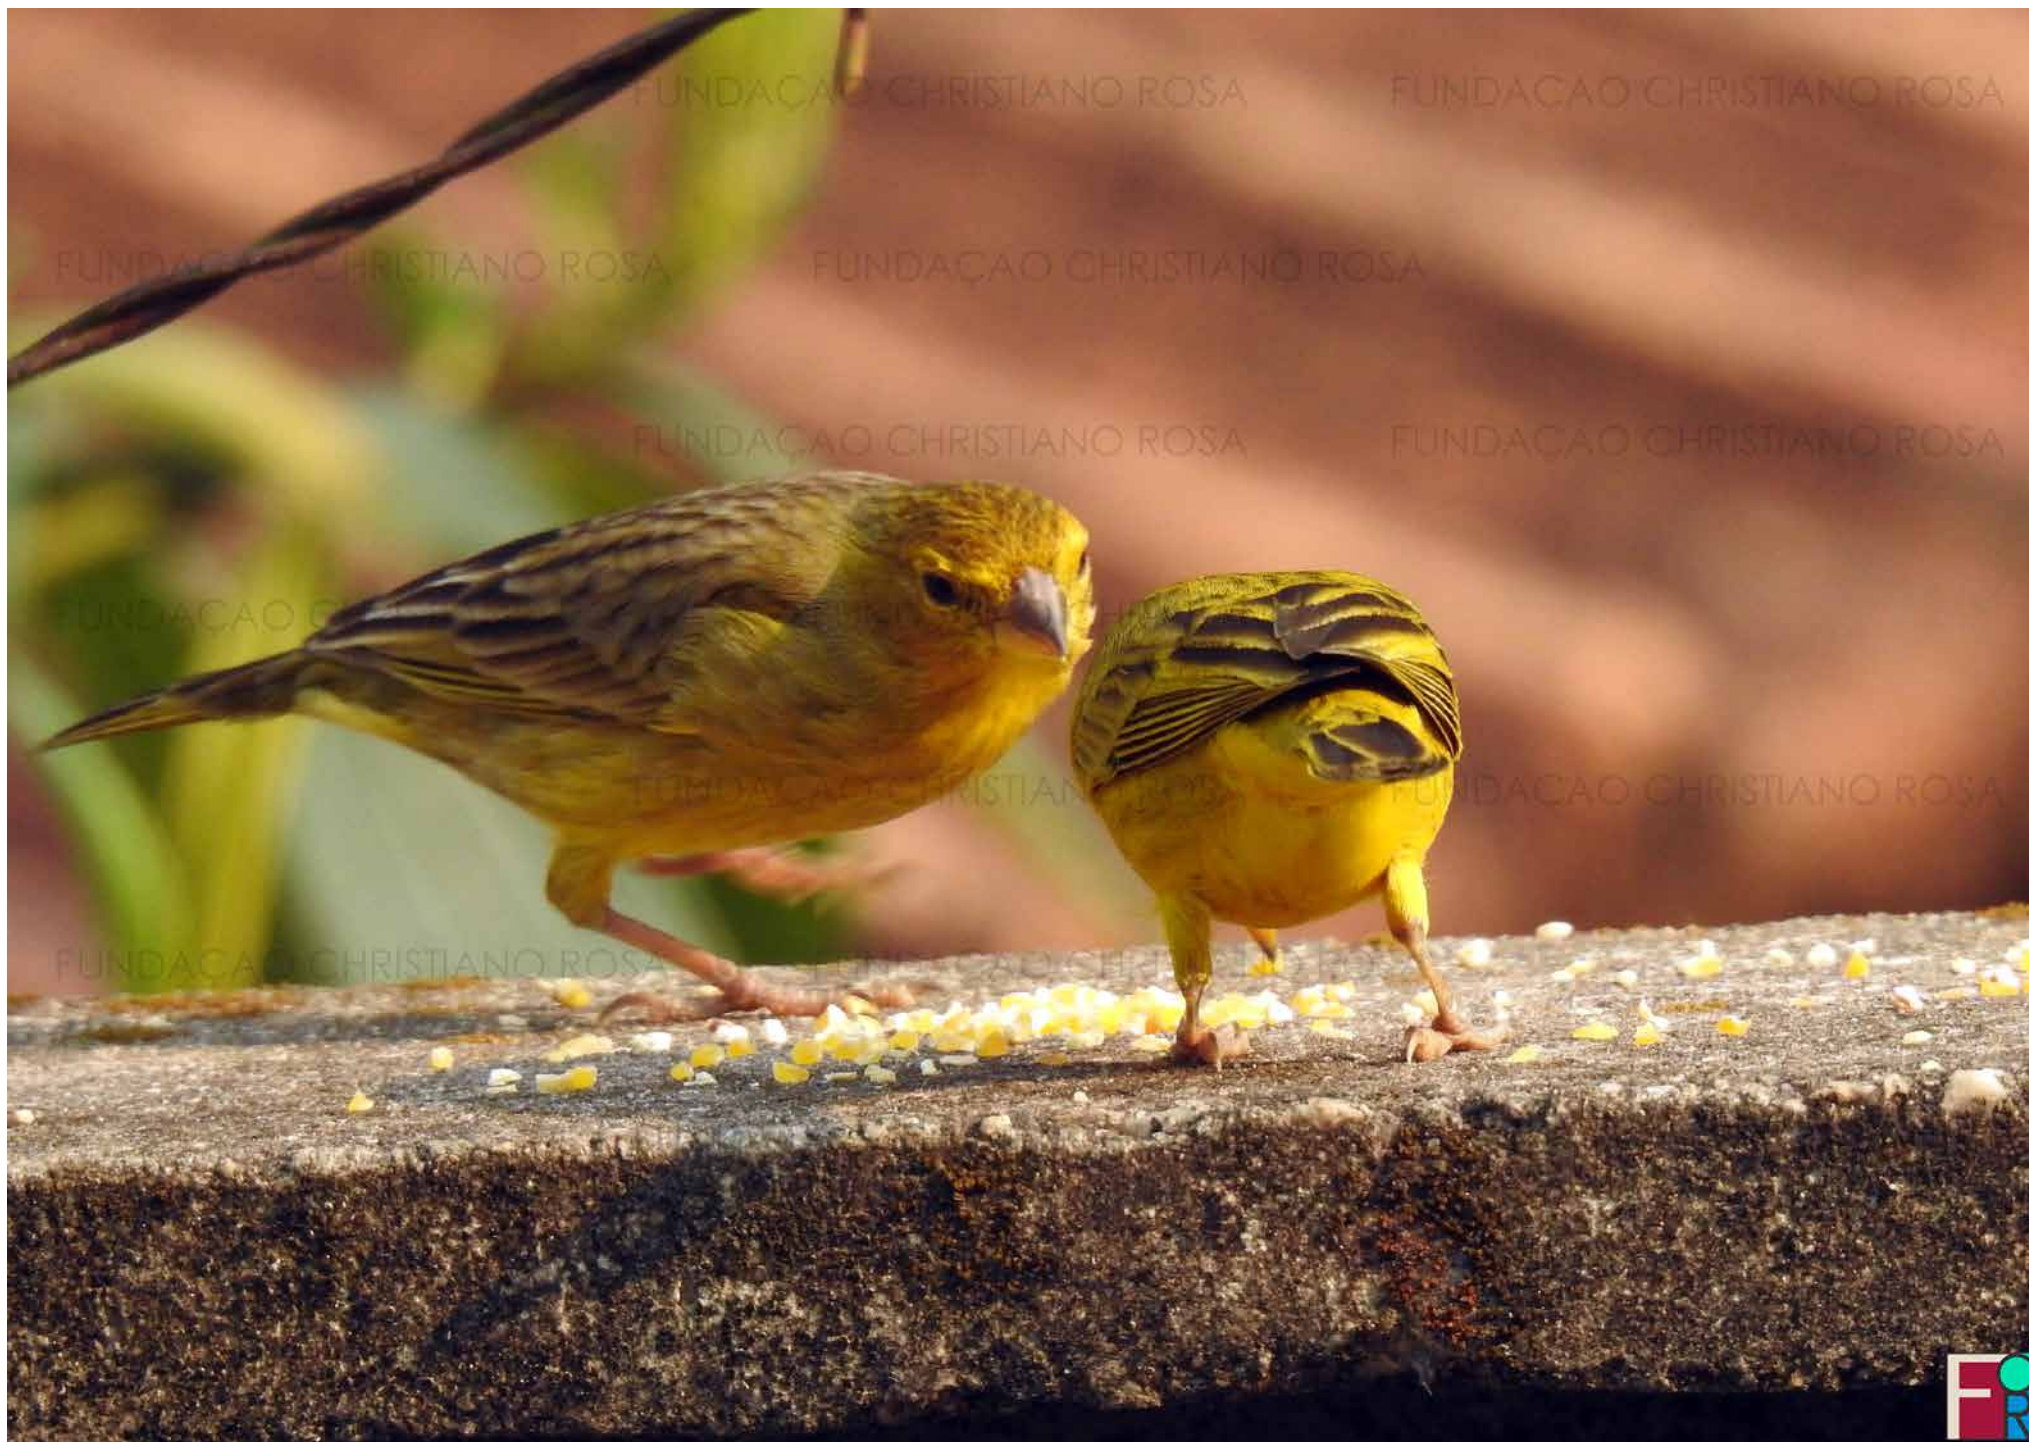

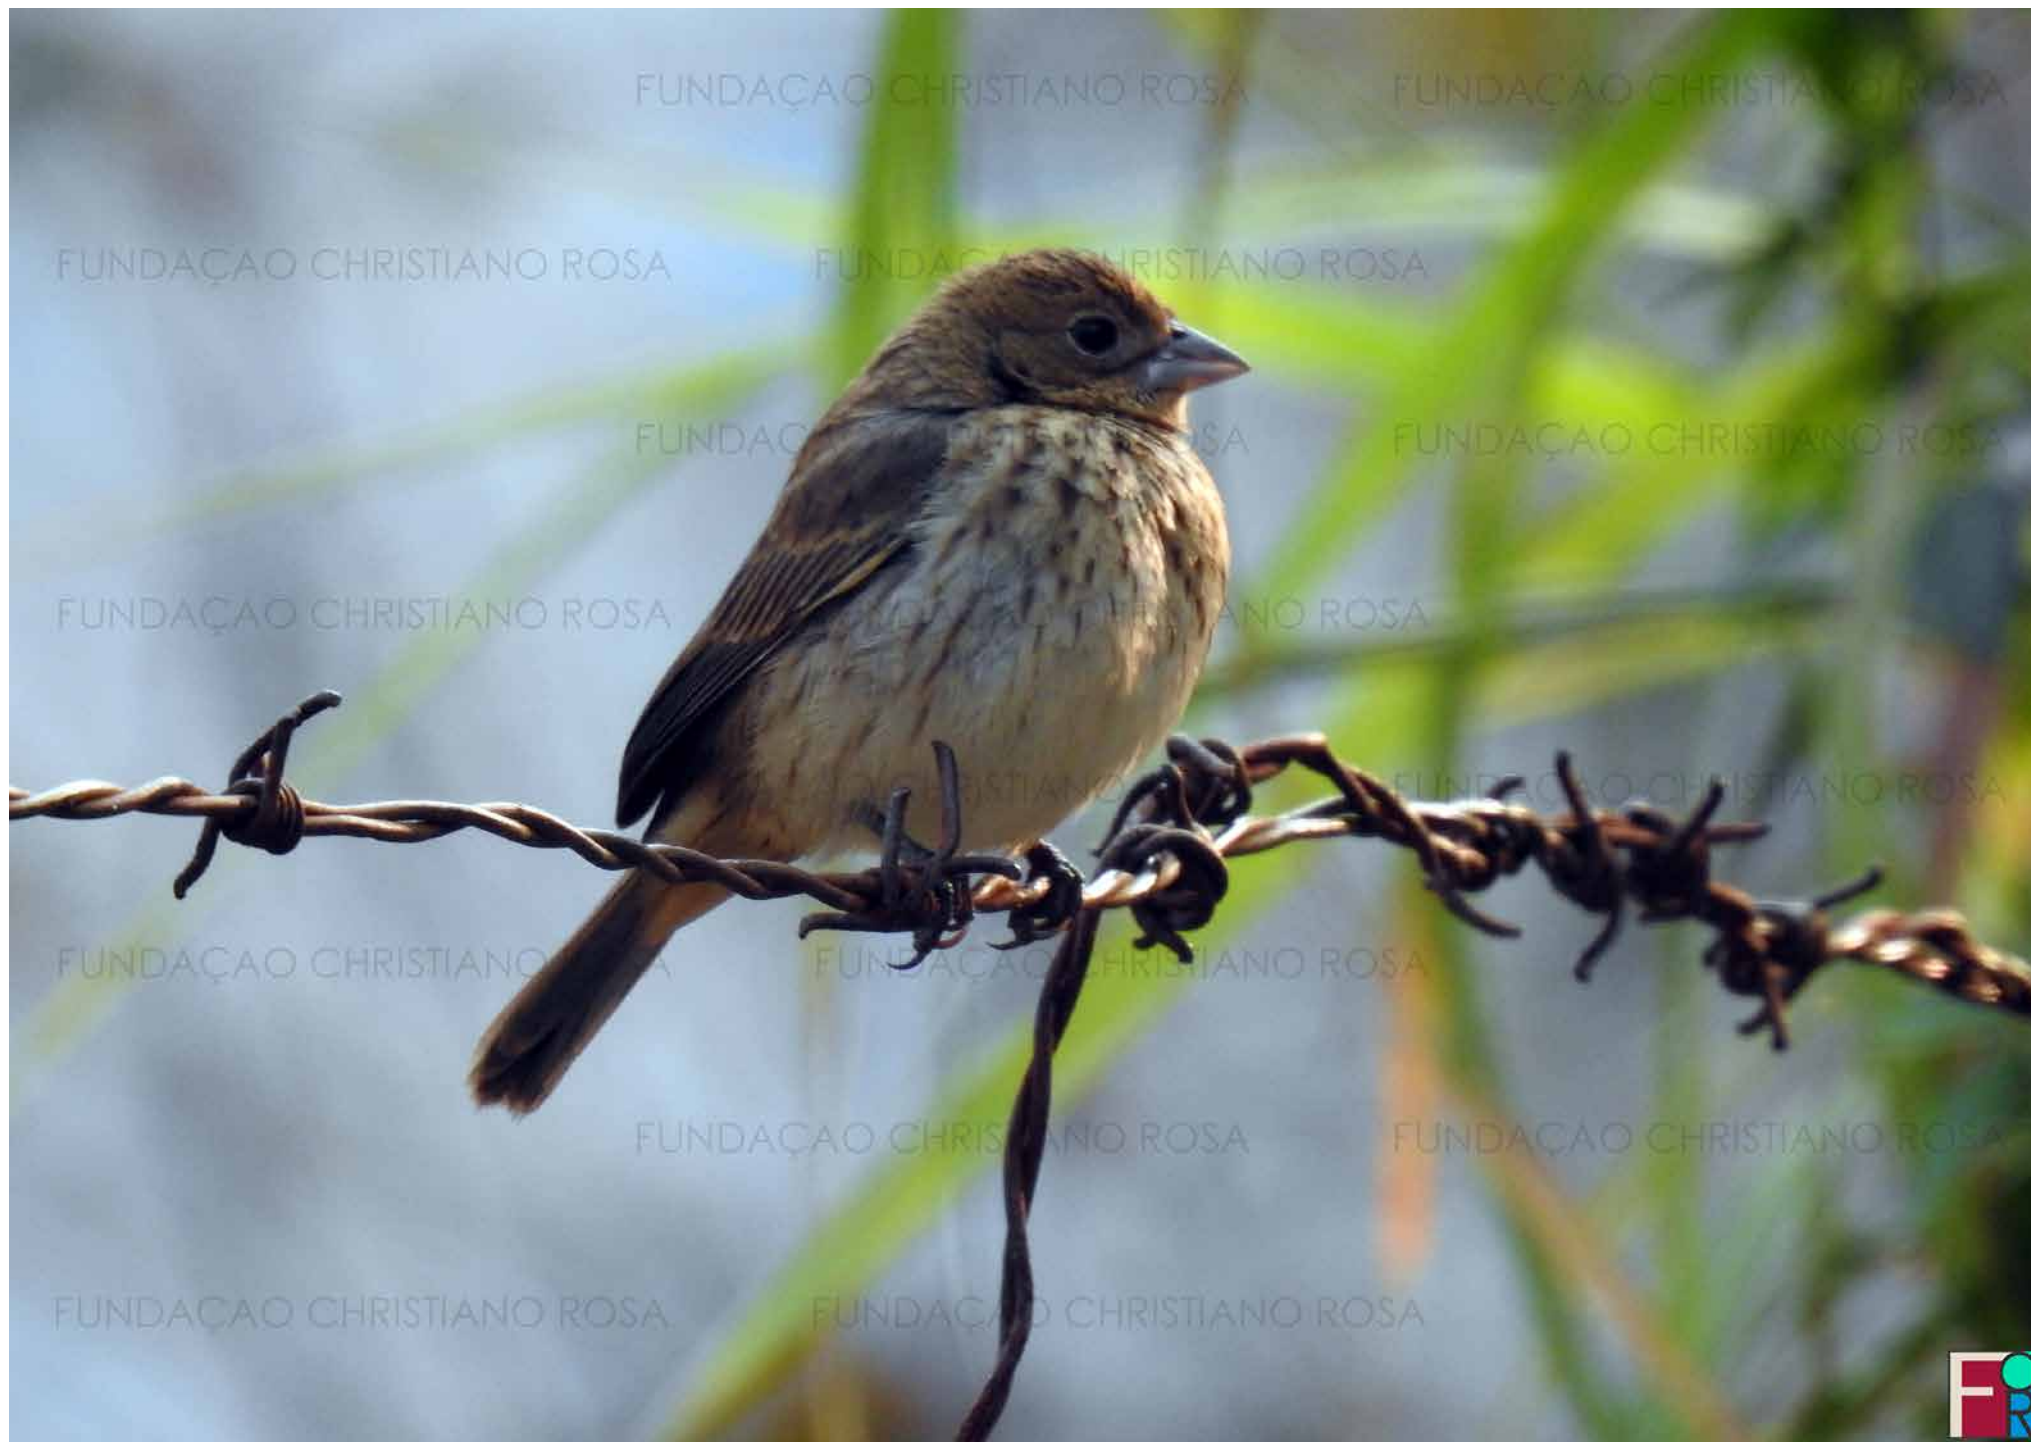

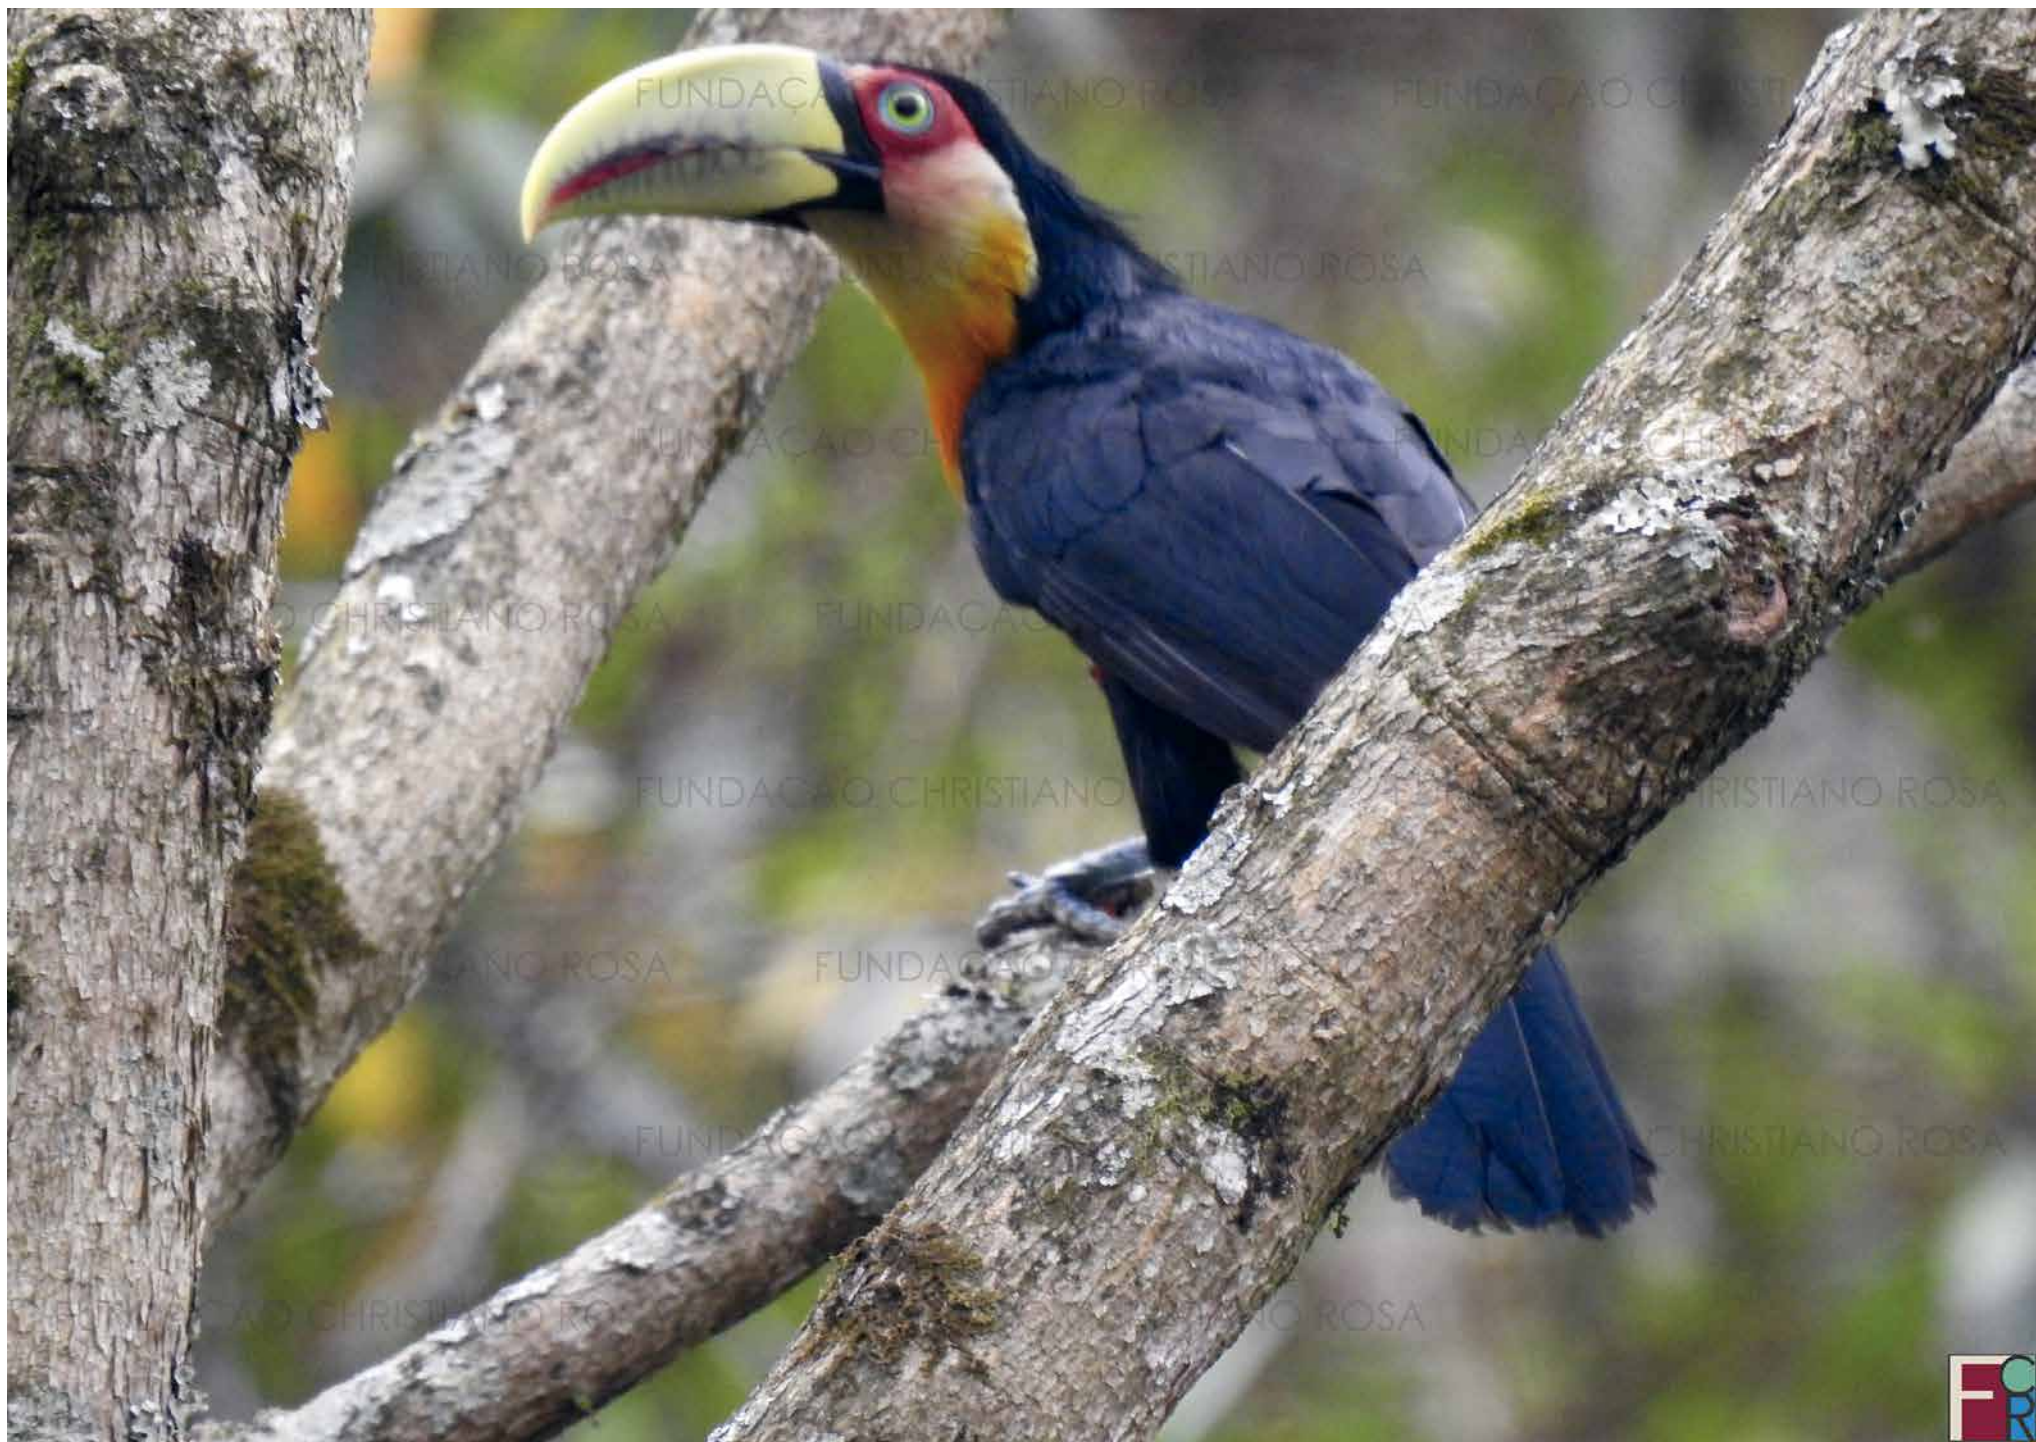

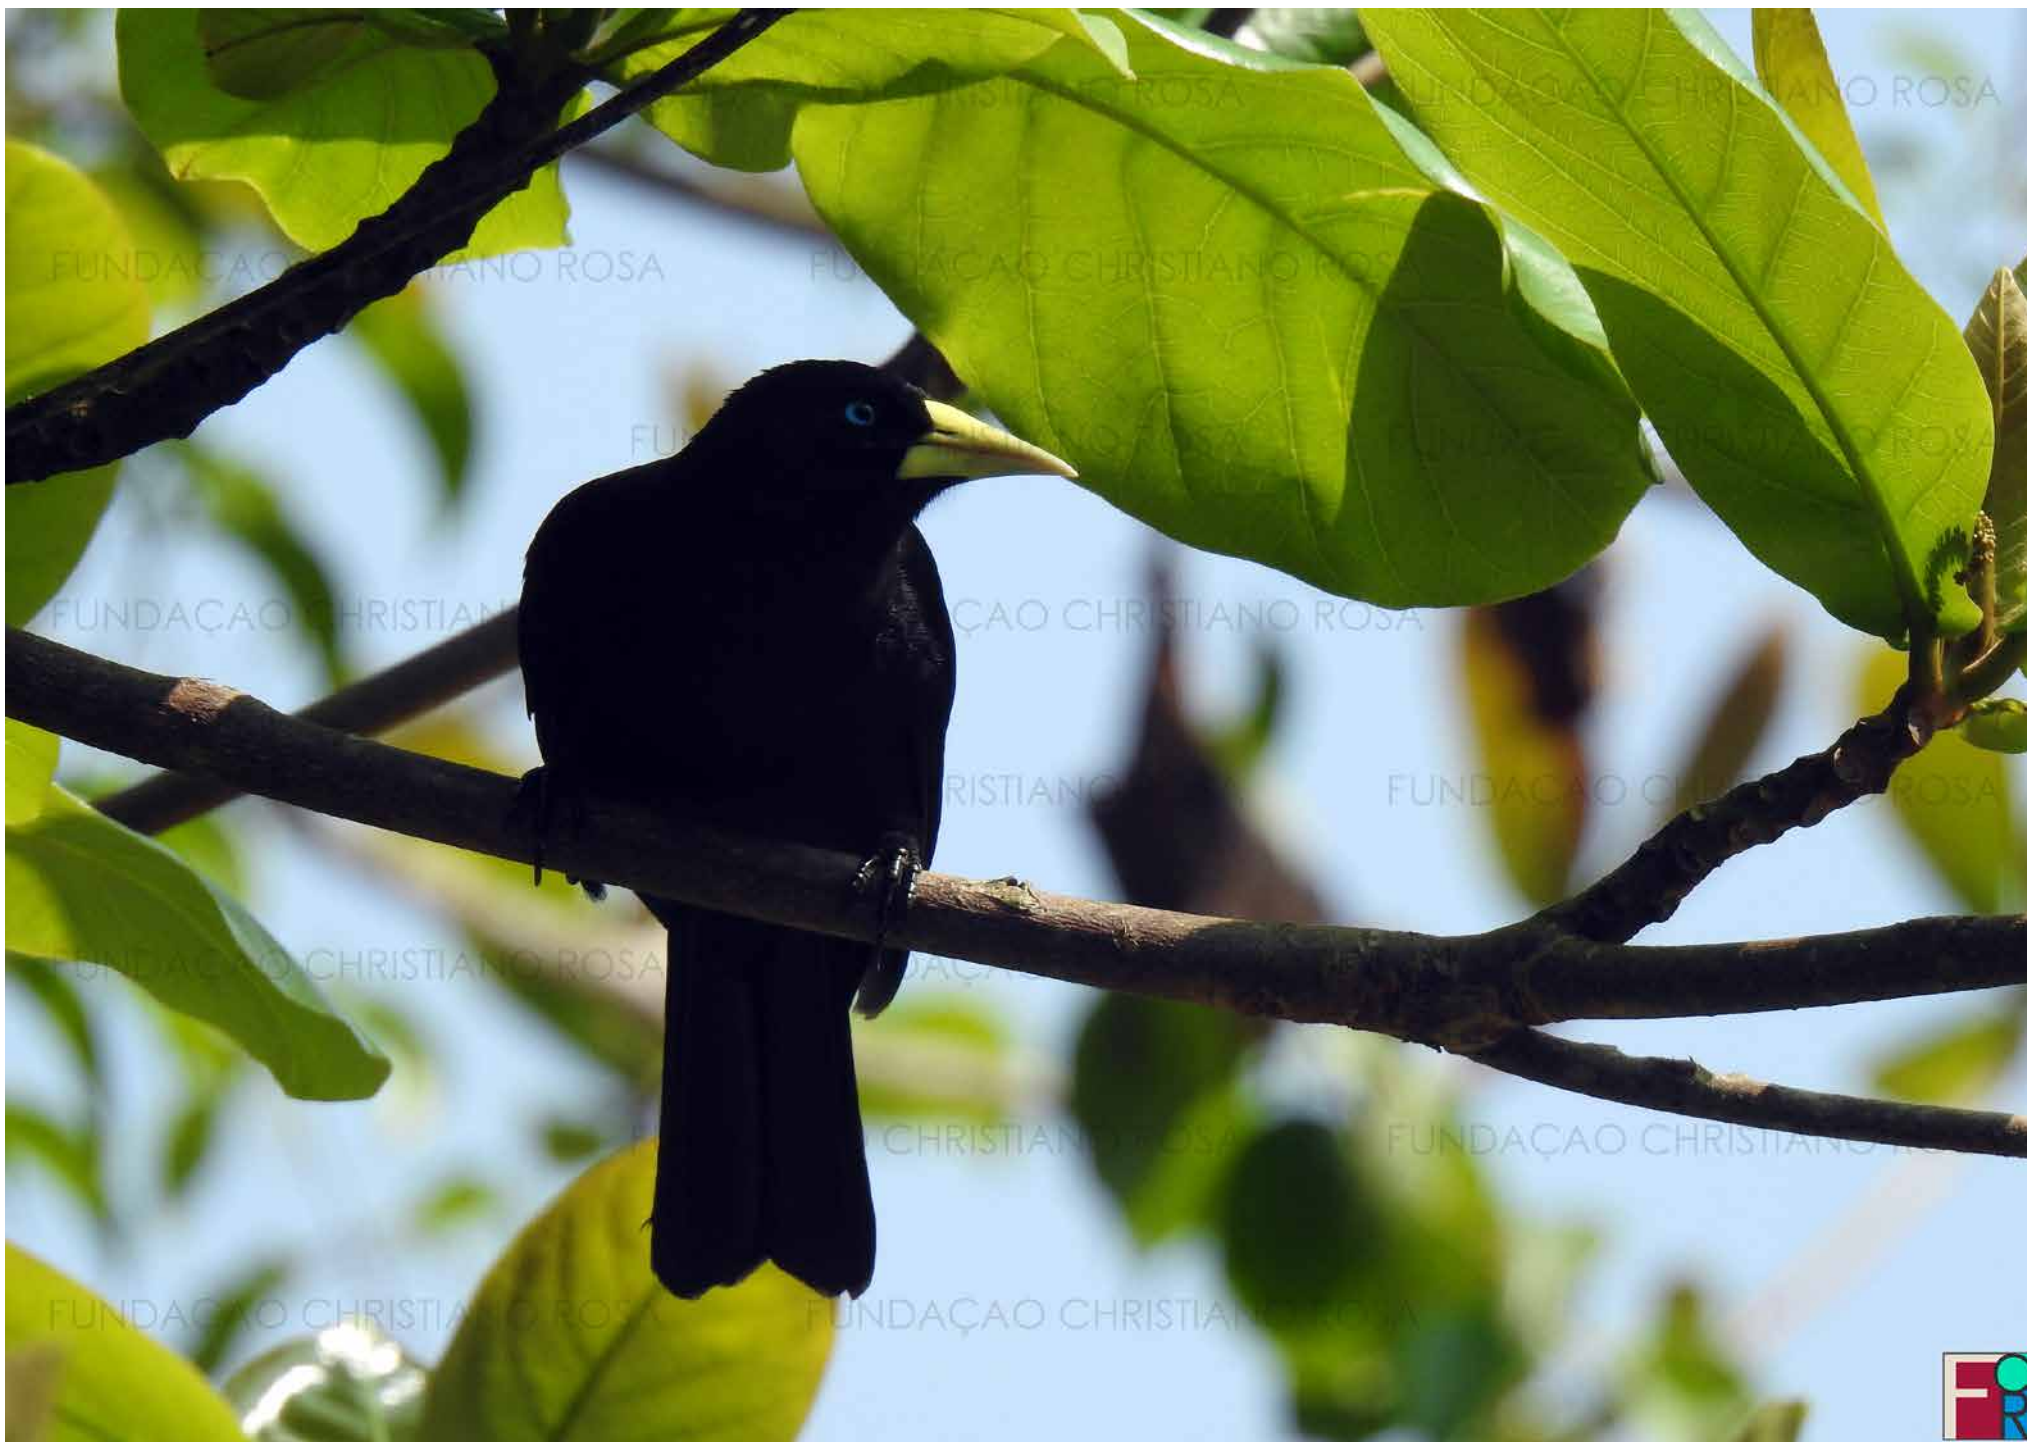

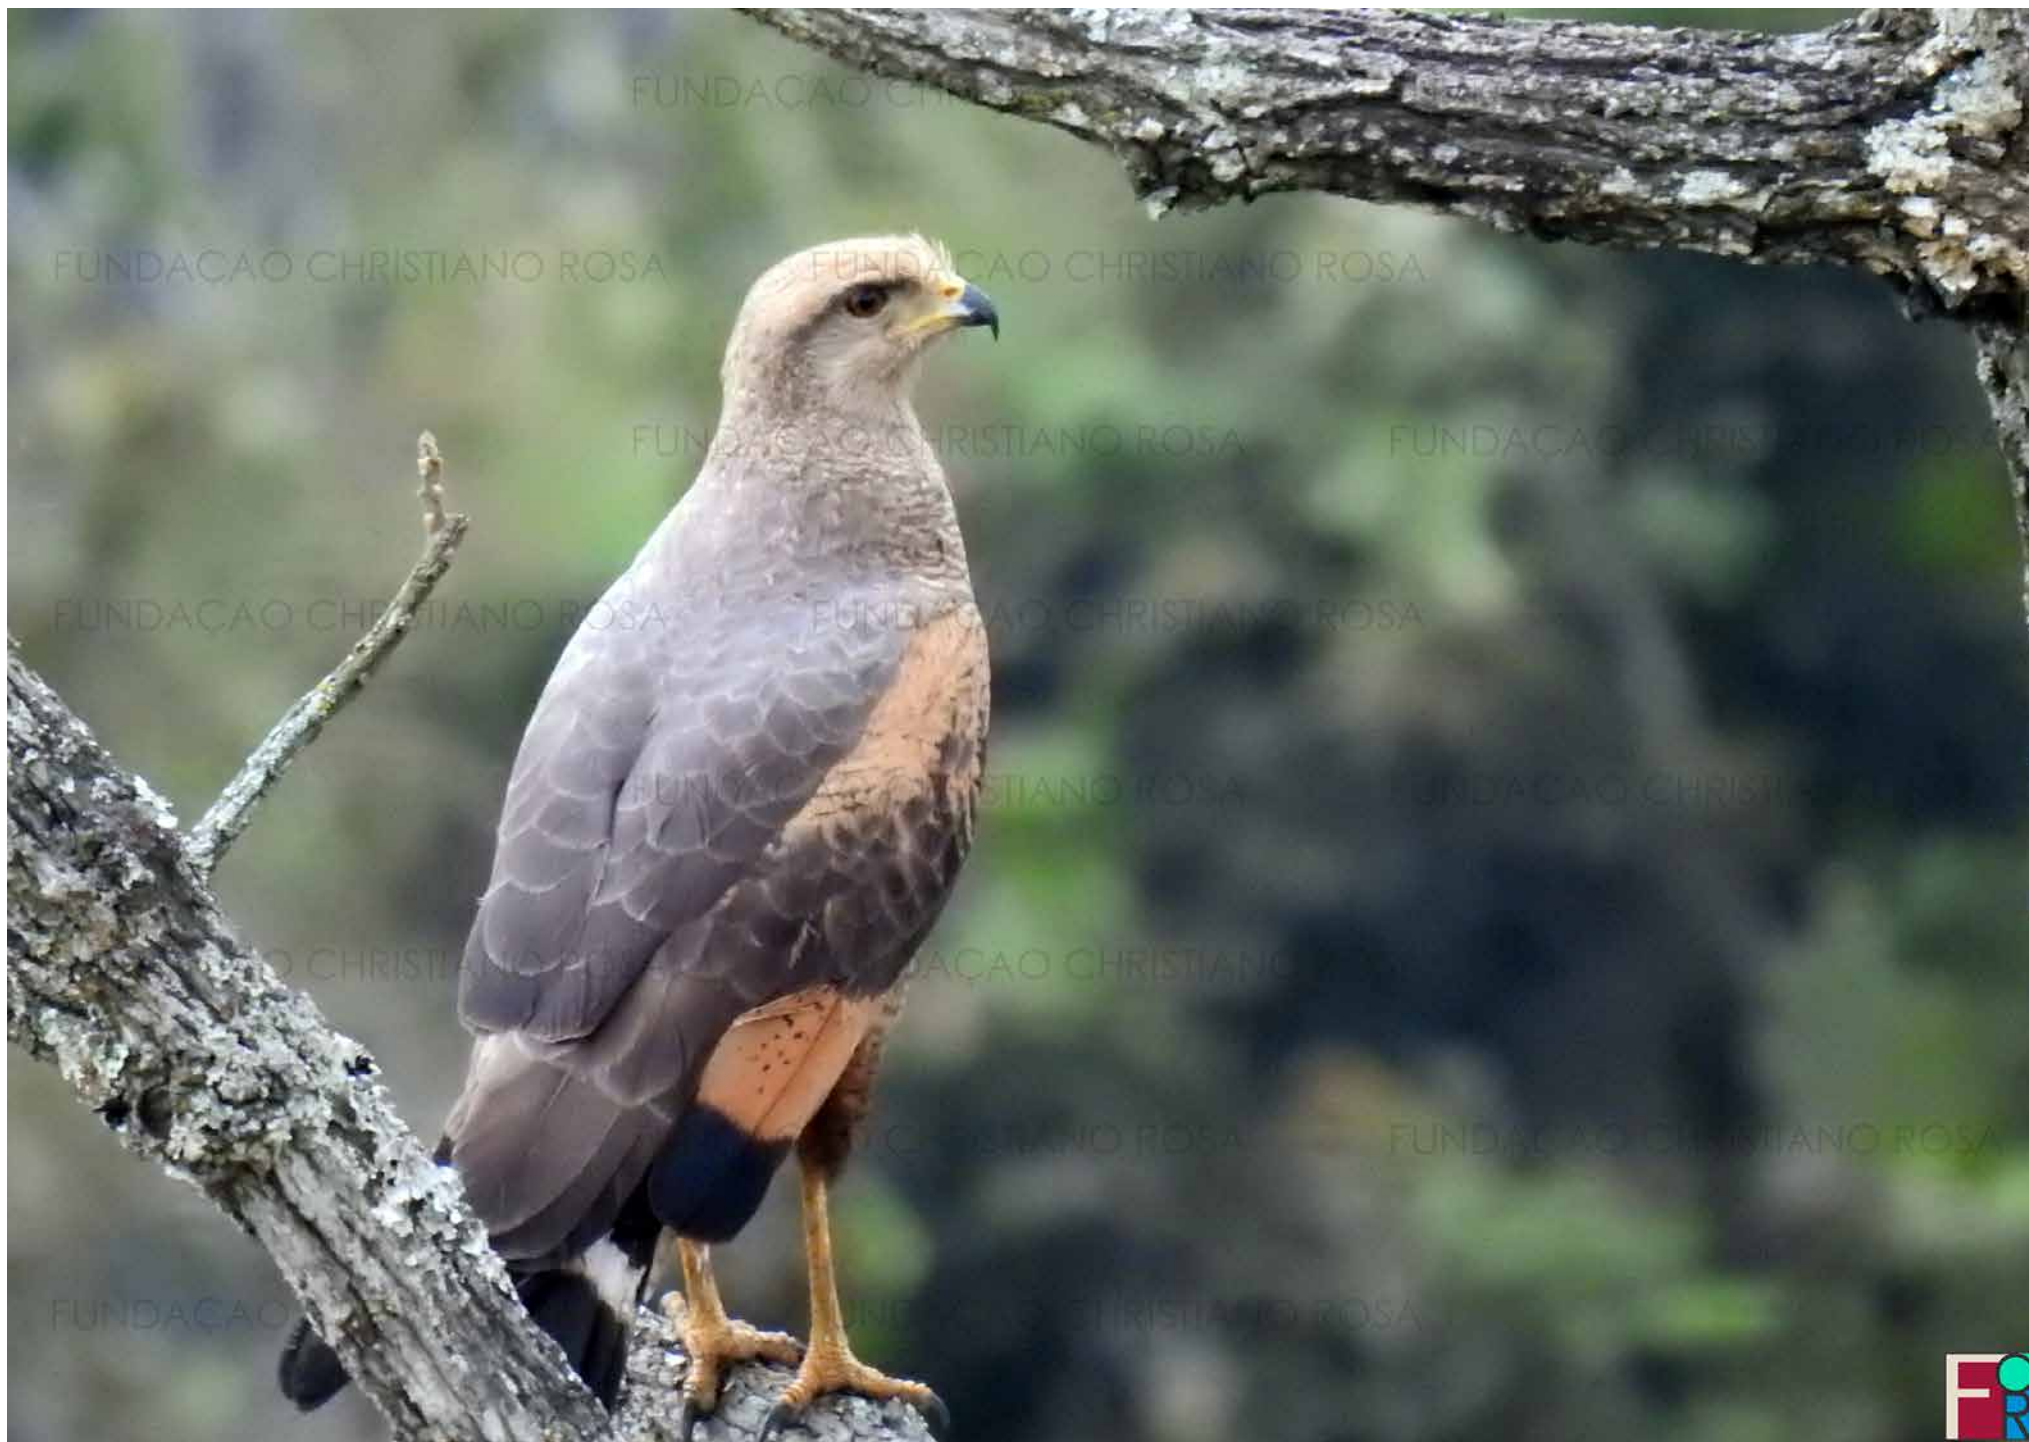

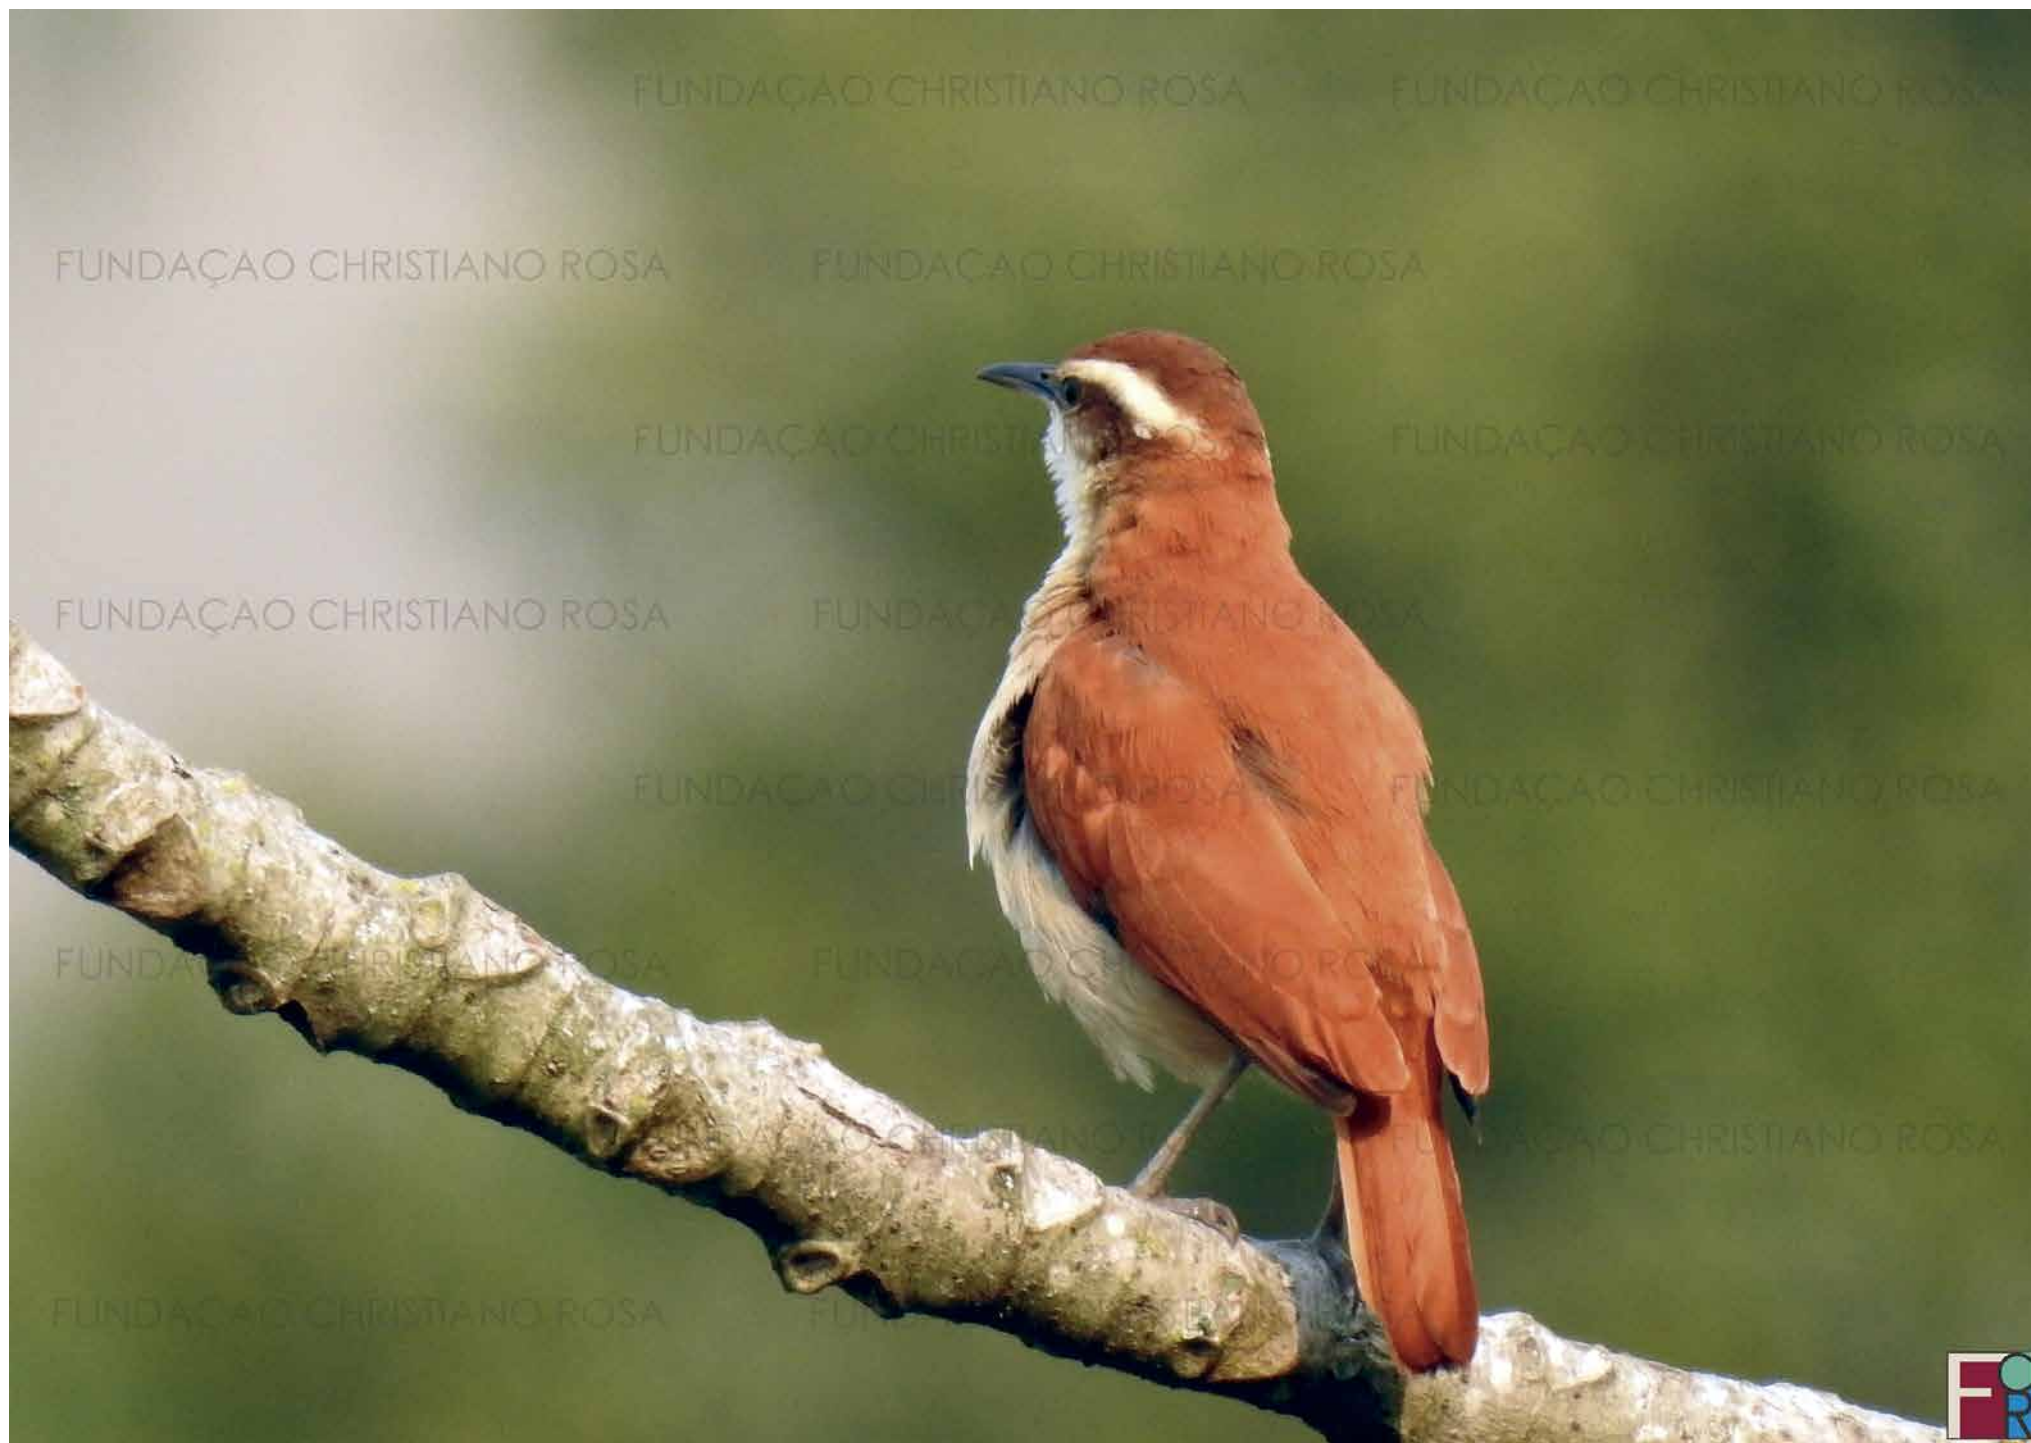

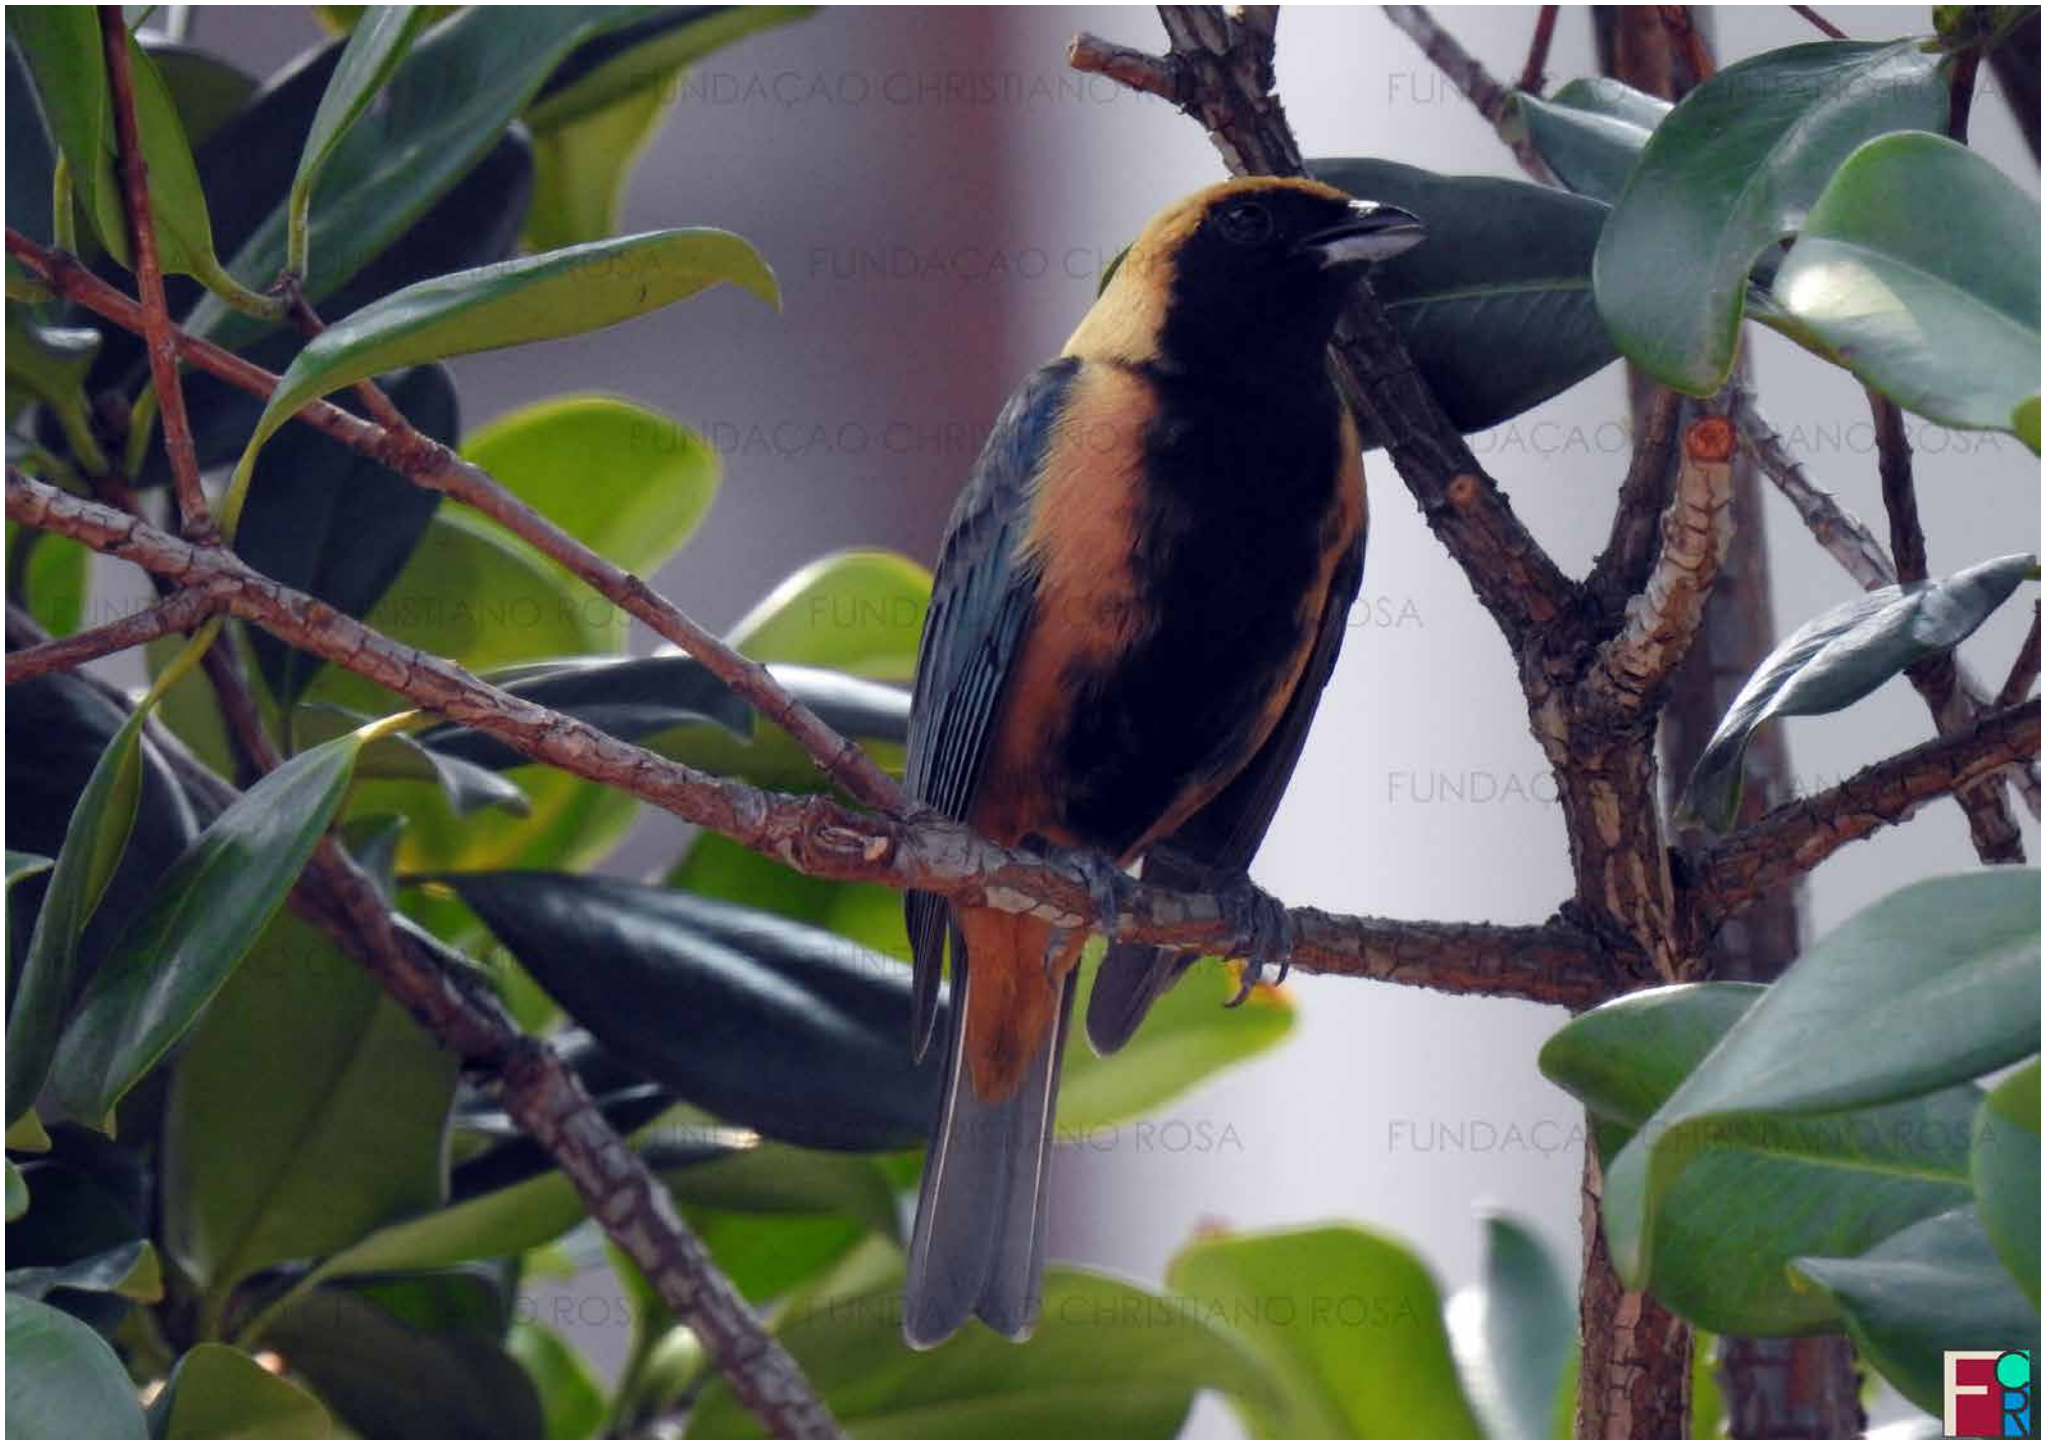

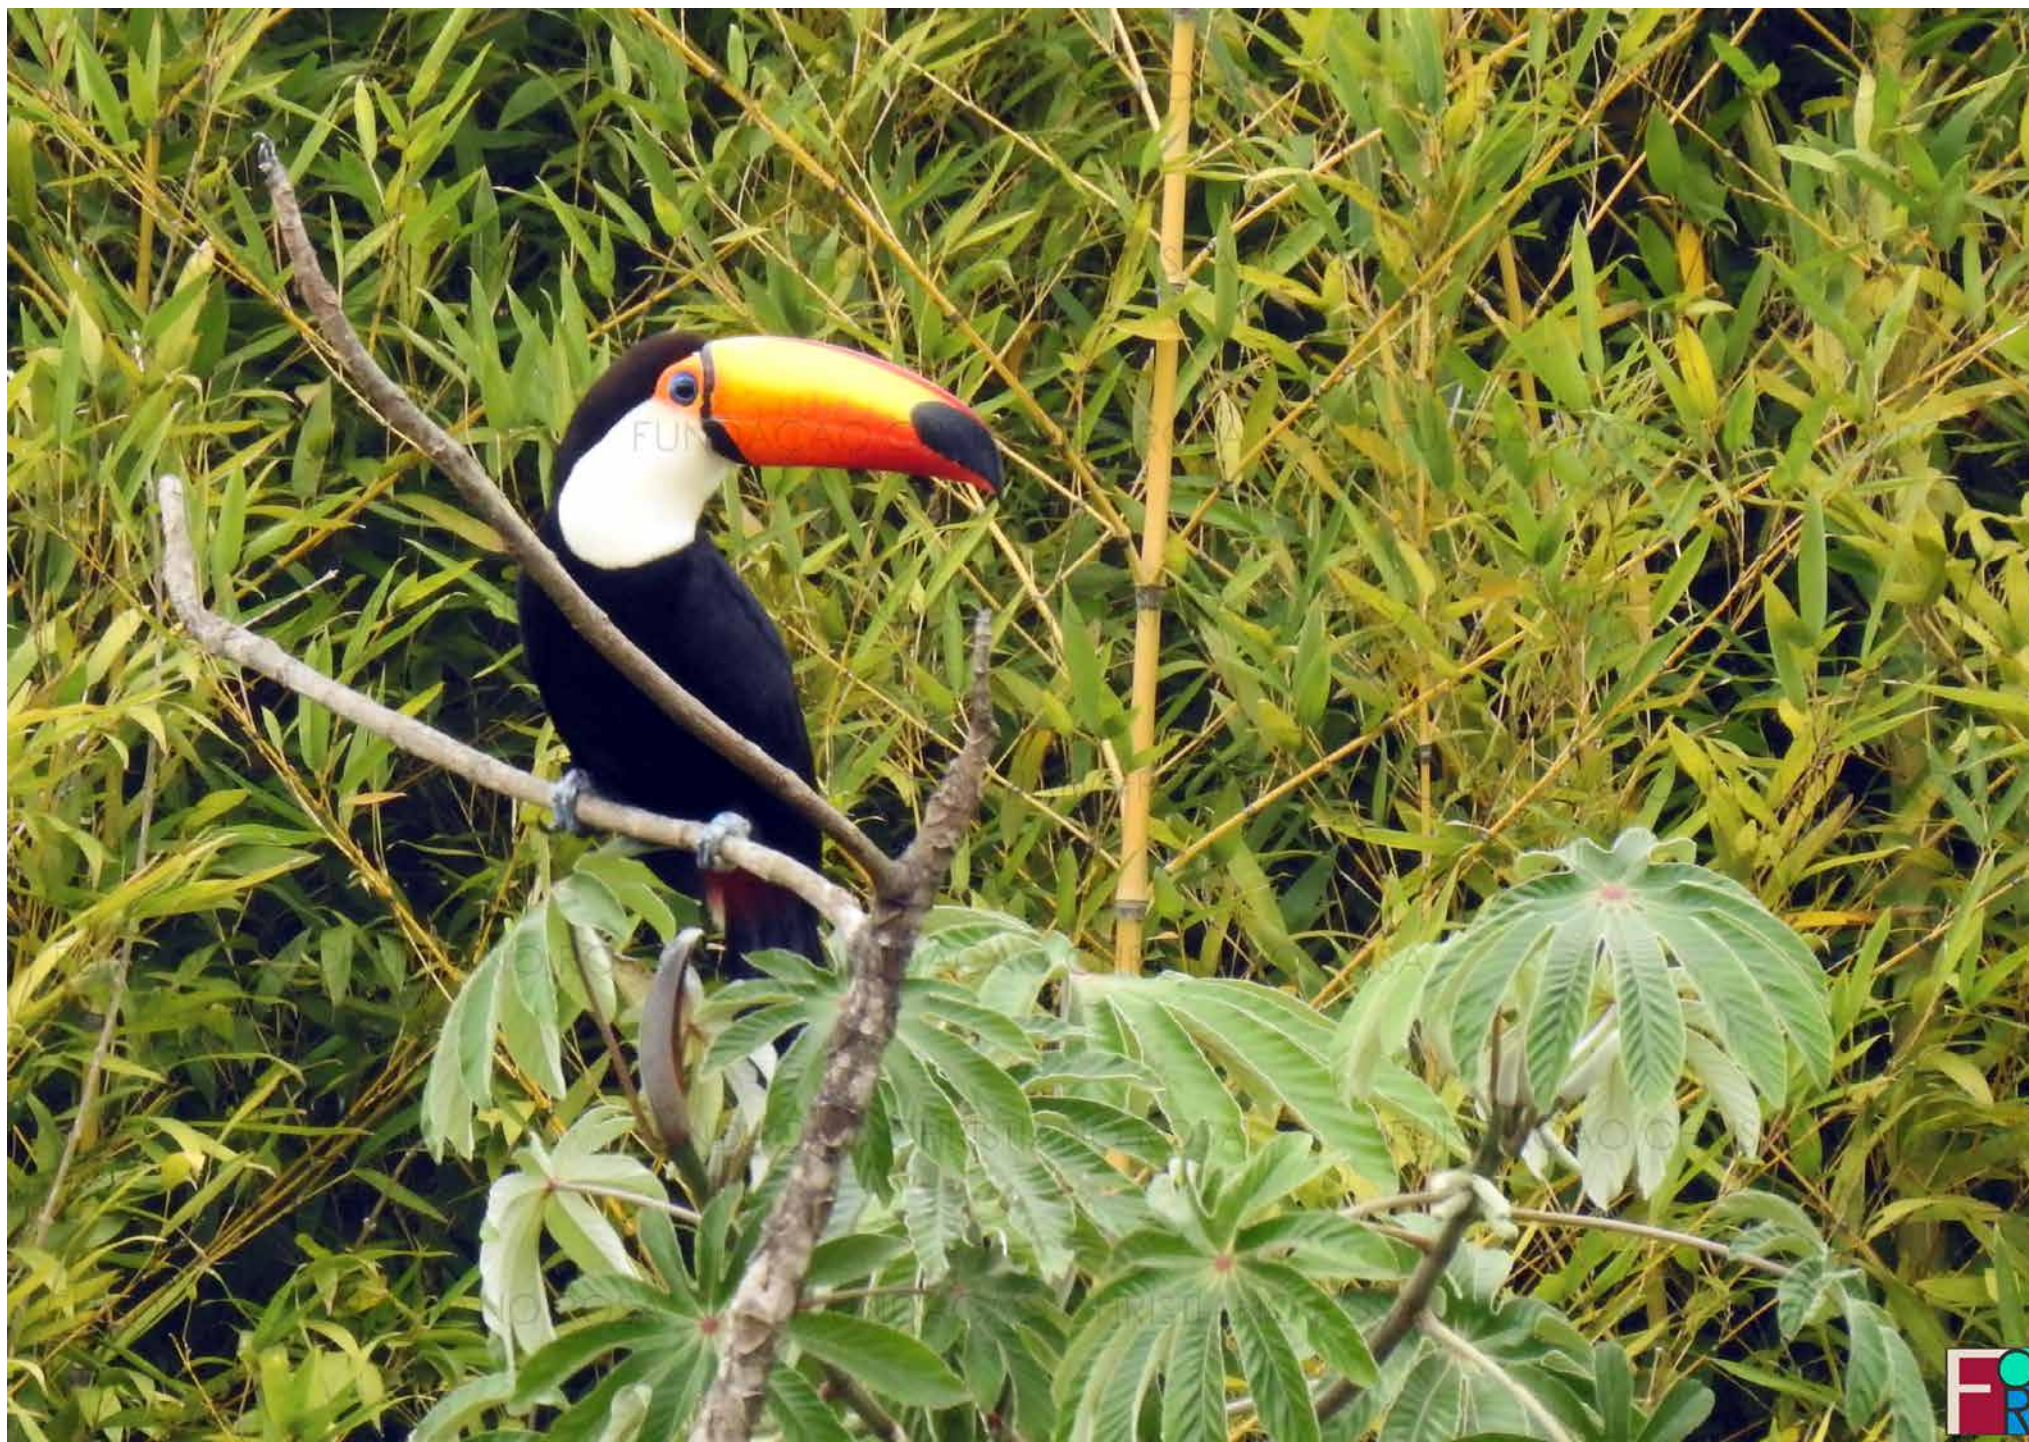

Aves do meu quintal
